BUDGET

RELEASE NOTES – JUNE 2017

This document explains new product enhancements added to the ADMINS Unified Community for Windows **BUDGET** system.

TABLE OF CONTENTS

1. POSTING [Fix]

The **Approve Budget Accounts** process was not replacing existing account selections with new account selections, when updating existing files. This was corrected.

[ADM-AUC-BU-3861]

2. REPORTS–Personal Services after Budget Is Posted [Fix]

When running personal services reports after the budget was posted, no records were selected. This was due to the group level selection of only levels 1 through 5. As the posted budget is at level 6, code was added to ensure that level 6 is reportable.

[ADM-AUC-BU-3864]

3. SCREEN DELAY [Fix]

Some sites with large data sets experienced a delay when viewing screens using scroll bars. The scroll bars were removed from multi-record screens to improve performance.
