1. BILLING

1.1. Generate Bills

When running the [**Generate Bills**] step for Miscellaneous Billing, a site reported an error that was preventing them from processing bills. This was corrected at the time and is reported here to document the change.

1.2. Duplicate Records in the Bill Print Sequence Table

There was an issue when the [**Copy Tables to New Year**] command was run more than once for a given year. This was corrected and now the copy tables command checks for the existence of records in the “to” year.

2. SETTING DEFAULT PRINTERS (V9.2 SITES ONLY)

To allow AUC users to conveniently set their default printers, a new button has been added to all screens. Clicking this button lets the user select a default from a list of the **printers installed on the AUC server**. Find this button next to the  [**Print**] button on the toolbar; click to display the available printers. Click on the desired printer and click on [**OK**] to set the default printer for use in your AUC session.

If you do not see this icon, then this option is not available on your site.
