

# NO MORE BUTTS, AUSTRALIA

Let's aim for a butt free environment

IT'S NOT THAT BIG OF A PROBLEM, IS IT? YES!

HOW ELSE CAN IT CAUSE HARM?

In 1 hour, chemicals begin leaching into the environment and can cause damage to our marine life.

Hundreds of fires, including bush fires, are attributed to smoking related causes each year.

BUT THEY'RE BIO-DEGRADABLE, RIGHT?

Cigarette butts are made from a fibrous plastic, known as cellulose acetate.

It can take up to 15 years for a cigarette butt to breakdown in sea water.

WHAT CAN I DO?

**RE-EDUCATE** - Let people know that butts are litter, aren't biodegradable and suggest they put their butts in a bin.

**RETRIEVE** - Make sure butts aren't on the ground. You can even arrange a Butt Patrol or a Big Butt Hunt to collect them.

**REMOVE** - Join us in advocating for the removal of plastic tobacco filters as part of State or National Single-use Plastic Bans.
