

So maybe i didn't have the most jacked up teeth by first appearance. however, years of alcoholism and not taking care of my teeth, i was missing a tooth on my smile, and hated smiling in job interviews or with my girlfriend sitting on my left side. And i developed tons of tooth decay and loads of tooth pain because I couldn't afford proper dental work. Then there is the stuff you can't see. But i can definitely feel. Or was feeling it. Back when the pain would get too bad the only solution in my mind was swooshing alcohol all throughout my mouth. That's the madness of it all. Needless to say, I am beyond thankful for the opportunity this special program that Austin Barrett has been able to kick start. Without him I am unsure where I would be. Prob somewhat Tooth/teethless and sober I suppose. And in a lot of pain. Also, a special thanks to all the doctors involved in making this happen as well. Which a huge feeling of gratitude towards Dr. Reiners in my case. This program and possibilities provided by the great men that started this organization to help out addicts and alcoholics is, simply put, AMAZING. THANK YOU Austin and Joe Barrett. —signed **Brandon Otto**, forever grateful!!!
