

CAPABILITIES SUMMARY

Marine Engineering, Maritime Operations and Shore Interface
 Infrastructure Design, Build, Maintenance and Repair
Veteran Owned Small Business

Value Proposition

-Unique Government Contractor operating all high risk tasks under EM385-1-1 regulations to include vessel operations, underwater construction, at-sea deployments, crane operations, floating plants and severe fall risk/rappelling.
 -Specialty equipment and access maintenance provider to include government operator certified diving equipment, hyperbarics, hydrographic surveying equipment, subsea sensors and tools as well as traditional vessel maintenance.

Services

Core Competencies

- Design Build Marine Infrastructure
- Ocean, civil, mechanical, electronic and HVAC engineering
- Maritime Operations to include cleared crew
- Specialty floating system fabrication and installation to include floating booms and security barriers
- Diving operations
- Marine Weight Handling Equipment
- Marine Fuel Distribution and Storage Systems

Demonstrated Capabilities

- At-sea operations, range support, and back deck operations
- Floating Systems to include booms, docks, barriers and moorings
- Fixed Infrastructure to include piers, seawalls, pile structures and ATONs.
- Specialty fabrication under military specification for aluminum and steel mooring bits, transportation containers, and A-frames.
- Fuel distribution facility design installation and remediation

Customers Served

- US Navy
- US Army Corps of Engineers
- National Oceanic and Atmospheric Administration

- US Coast Guard
- US Forest Service
- National Park Service
- US Geological Service

Prime NAICS Codes

237990 Other Heavy and Civil Engineering

 53241 Water Transportation Equipment

541330 Engineer
 541990 Professional and Scientific Services
 336622 Ship Building and Restoration
 237120 Oil and Gas Related Structures
 332710 Machine Shop

Why We're Different

Our personnel have extraordinary marine operation skills sets to support government specific requirements. As opposed to typical local marine operators who justify squeezing their commercial vessels and tools into the government requirement, we source innovative solutions and apply qualified personnel
