

September 16, 2022

Another week down and a ton of work going on.

We had another hailstorm Sunday and a torrential downpour on Monday so unfortunately more damage has occurred. We continue to schedule for testing, demolition, and roof replacement. Please keep in mind that the schedules we make are not set in stone and are subject to change if a need arises as it did this week. We will do our best to give you notice if things change.

I have been informed by our contractors that they have received nothing but wonderful people and claim we have the "nicest residents", but I already knew this 12. A BIG thank you to you all for your patience and understanding during this extremely frustrating and stressful situation.

The roofs scheduled for replacement next week are:

247 Sarta 373 Pena 186 Quinta

This week has been a difficult week and I have no further updates for this week.

I wish you all a wonderful weekend.

Dorothy

Love it!

Good one!

Very nice!
