Client Focused

KCCi's commitment to customer satisfaction and retention is reflected throughout every phase of every project; from innovative custom designs, through neat and flawless installations; project mapping for reference on future upgrades. Perhaps more importantly, KCCi's technicians are available "24/7" to provide industry leading solutions for any networking challenge you may encounter. Your network is an essential business component; KCCi understands that and our practices reflect that understanding. A properly designed & installed cabling system will probably outlive all of the other networking components in your business.

KCCi

KCCi has been servicing the voice & data cabling needs of business and industry since 1986, traversing the nation to fulfill every imaginable cabling infrastructure requirement. Since our founding, KCCi has built a solid reputation for impeccable installations, state-of-the-art technological craftsmanship, and unrivaled performance.

Structured Cabling Infrastructure is a Sound Investment in Productivity

A structured cabling system represents approximately 7% of your total network investment. Cabling infrastructure from KCCi is a sound investment in the productivity of your company.

Network Infrastructure Design

Business dependency on communication systems has never been greater. More than 96 percent of all business transactions are now initiated by telephone calls, computers, servers, routers, switches, emails, websites, voicemails, video, security, unified messaging, faxes and multimedia. Nearly all business is transmitted through your cabling infrastructure. KCCi provides expertise in:

- ✓ Server Room & Rack & Ladder Rack Installation
- ✓ Cabinets, (wall mount & freestanding)
- ✓ Cable Trays & Raceways
- ✓ DEMARC, MPOE & Smart-Jack Extension/Relocation
