Course Name: I.T.Skills

(LL.B. Part-II, Paper-VI)

Course Name:	I.T Skills
Year 1 : Credit Hours:	2 Credit Hours
Marks:	40

Objectives: To familiarize the students with the conceptual and hands on expertise as to how the computer system works. To realize other important elements of a computing environment i.e. Operating System To make some foundation of Word Processing(Microsoft Word) and presentation (Microsoft PowerPoint) software which helps students to formally type their assignments, project documentation and design and deliver effective presentations.

In addition the students with the concept information systems, data analysis, decision making, multidimensional data processing with the help of Spread Sheet software. Students can process their data using statistical techniques and define reporting mechanism through graphs. Course also covers internet usage and information retrieval techniques for novices. Student can write optimal search queries on search engines.

Course Outline:

BASIC THEORY OF COMPUTER SCIENCE:

Computing Fundamental, Data and Information, Software, System software's, Operating system Functions, Operating system utility Programs, Type of Operating systems. Application software, Business Software, Graphics and multimedia software, Software of homes, personal and educational use, Application software for communication, Application software on the web hardware, Input devices, Keyboard, Pointing devices, Mouse ,Other pointing devices ,Voice input ,Digital camera, Video input, Scanner and reading devices, Output devices, Display devices, Flat Panel devices, Printers, Speakers and Handsets, Other output devices, Storage devices Floppy disk, Zip drives, Hard disk, CDs and DVDs ,Tape. Liveware, Need for Information and Processing, Digital and Analog Computers, Binary System and its Application, Internal Design of Arithmetic and Logic Unit (ALU), Design of Micro Computer, Flynn Classification, Role and Function of Operating Systems, Operating System Concepts, Types of Operating Systems, Programming Languages.

MICROSOFT OFFICE COMPONENT:

Microsoft Word:

Microsoft word, page, page formatting, font and font style, paragraph, line spacing, paragraph spacing, page layout, portrait and landscape, printing options, header and footer, page number, hyperlink, super script, sub script, bullets and numbering, line break, section break, Drawing, drawing Objects, References, endnote, footnote, citation and bibliography, table of contents, table of Figures, print preview, Spell Checker, thesaurus, grammar check, Password option, file level and Operating system Security.

Microsoft PowerPoint:

Introduction to Power point, Presentation styles, view, Slide show view, slide master, tables, pictures, clip art, photo album, shaps, hyperlink and charts. Slide themes, background styles, animation, transition sound and transition effect. Printing slides, handouts, notes pages, outline view and page per slide.

Microsoft Excel:

Data and Information, Data Hierarchy, Bit, Byte, word, field, record, file and database. Spread Sheet Software. Table presentation of data, Columns, rows and Cell. Formula, Intelligent fill feature, Operator Precedence and Associativity, Arithmetic Expressions, Solving data processing problems

with arithmetic expressions, data sorting, Ascending order and descending order, Multi order sorting, Query data through filters, Apply Filters, Custom Filters, Pivot table analysis, Graphs and chart types, Print views.

Network Basics:

Networking, Network types, LAN, WAN, MAN,GAN, network protocols, LAN card, Network Topologies, Bus, Star, ring and mesh topology, Modulation and demodulation, Introduction to internet, concept of search engines, How to write good queries on search engines. Site search, range search, stocks search, definition search, synonym search, AND and OR search operators, + and - as search operators. Simple Mail Transfer Protocol, File Transfer Protocol, Email, HTTP, Search engines, Web Portals, Browsing throw E-Government and E-Business sites
