

WENS – Wireless Emergency Notification System

Sign Up Form – Alpine Lake Public Utilities Company

WENS is our emergency notification system. ALPUC only uses this system to notify you about your water/sewer services, we do not share your information or allow other use of this system. This is the most effective method for us to reach you with important information such as water outages, boil water advisories, road closures, smoke testing or any other issues that may affect your service or area around your home.

NAME AND ACCOUNT # _____

SERVICE ADDRESS _____

CELL PHONE (TEXT ALERT) _____

Customers may also provide an email; however, it has been our experience that many of the emails fail to be delivered due to firewall/spam protections of individual email accounts. ALPUC has notified the software company. It does not appear to be an issue that has been addressed by them, so we recommend signing up for text alerts to a cell phone.
