Get your calves started off right, with TechMix

Calf Renova is an easy-to-use capsule containing an essential oil, yeast & probiotics.

Calf Renova helps to reduce harmful bacteria, enhance intestinal microflora and encourage dry matter intake any time normal digestive health has been interrupted.

Newborn/Weak Calf Protocol

Calving difficulty, cold or extreme weather conditions, disease, or management changes can all result in a calf needing an extra boost in energy to help them return to normal function and appetite.

Calf Perk® provides an immediate energy boost for depressed or weak calves by helping increase their ability to stand and their suckle reflex.

SELENIUM & VITAMINS A, D & E DOSING HAS NEVER BEEN EASIER

Vitaferst-Care™

is a convenient oral supplement designed to address the neonatal nutritional needs of calves, lambs and goat kids.

Most production animals' nutrient levels are normal at birth but can be rapidly depleted during the neonatal period. This can limit their potential. That's why supplements are often required when milk is the sole source of nutrients.

Vitaferst-Care's Oral Formulation Includes:

- Selenium** to promote growth
- Vitamin A** for promoting neonatal immunity
- Vitamin D** to support growth and metabolism
- Vitamin E** to stimulate the immune system
- Vitamin B₁₂** for cell growth and support of the immune system

One Oral Dose instead of multiple needles

Draw off cap and oral syringe included with every bottle

Give your livestock the best start possible with Vitaferst-Care™

Canadian Patent No. A8144435CA

Contains the essential ingredients for calf rehydration - Glycine, dextrose, acetate and electrolytes. AVL Electrolyte Powder is designed for maximum absorption following oral administration.

SX CALF - LIQUID

• ADVANTAGES OF Sx CALF

- Premixed solution
- Rehydrates the calf and improves fecal consistency more quickly than any other product
- Balances the microbiota of the calf and supports natural immunity
- Requires only **one** 50 ml oral feeding*
- **Reduces mortality/morbidity** up to **75%** versus other products
- Saves time and labor expense
- Non-antibiotic/No VFD required

*In up to 90% of cases

PREMIUM CALF COAT

At temperatures below +10 C° the risk of illness increases. The Kerbl Premium Calf Coat provides protection against sudden changes in weather, avoiding cold stress in new born calves. Calf blankets support the immune system during the first few days, however calves generally wear calf blankets for 3-4 weeks. Calf blankets are not suitable for group housing.

- Back length: 80cm
- Maintains heat through PU foam layer
- Extremely water-resistant (up to a 5,000mm water column) and breathable 4-layer material
- Soft and sturdy
- Excellent fit and flexible size adaptation thanks to adjustable flexible belly guard, leg strap and Velcro fasteners on the chest
- Machine washable at 30 C°

KVS	DESCRIPTION	COLOUR	SIZE	RETAIL
376-029	Calf Coat Premium	Black	80cm	\$60.00
376-044	Kerbl Calf Resuscitator			\$199

HK Calf Resuscitator

The HK Rheintechnik calf resuscitator looks like a large air pump. The suction cup is placed over the calf's nose and mouth.

1. Mucus is removed from the respiratory tract in one powerful stroke.
2. The mucus is expelled from the pump, then air is pumped into the airways. The lung's lobes and alveoli can unfold.

LUBRICANTS

100-041

Ideal® Animal Health PolyLube

PolyLube is a non-sterile, non-spermicidal, all-purpose powder lubricant concentrate for use when performing obstetrical examinations on horses and cattle.

- Concentrated Powder Lubricant
- Helps minimize irritation to the animal's membranes
- Dissolves easily in warm water
- Shaker top allows for easy pouring and mixing

J-Lube

is a concentrated powder that dissolves easily in water and is a very effective obstetrical lubricant. J- LUBE is completely inert and non-irritating.

J-Jelly

An ideal all around lubricant for rectal and obstetrical procedures. Contains methylcellulose.

First Defense® Bolus and Dual-Force® Gel Tube for Calf Scours Prevention

An immediate guaranteed dose of immunity against E. coli and coronavirus infections, in a bolus or single-dose gel tube.

Instantly deliver the passive antibodies newborn calves need to prevent scours. Jump straight to antibody protection while removing reliance on the common variable vaccine response of dam- and calf-level vaccines. One dose, a single bolus or gel tube, administered at birth gives each calf a guaranteed level of protection from E. coli and coronavirus infections.

SCOUR TREATMENT & PREVENTION

KVS	DESCRIPTION	SIZE	RETAIL
791-003	First Defense	5s	\$80.00
791-001	First Defense	30s	\$420.00
791-002	First Defense Dose Gun		\$6.00
791-005	Dual Force	12s	\$215.00

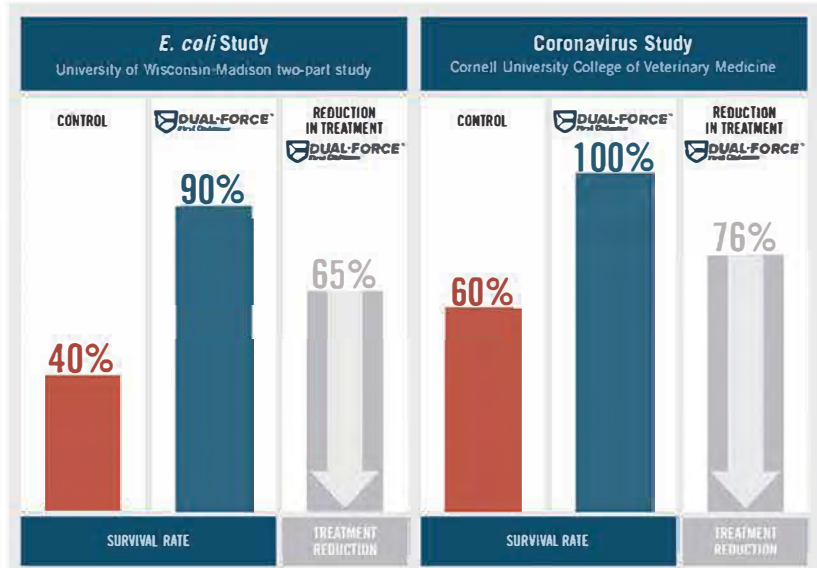

DUAL-FORCE PASTE ONLY

Protocol Tracker:

The blue dye in the paste is non-digestible serving as a tracker through the system to ensure the calf has received treatment. First fecal stool after administration will be blue-green in color.

GO BEYOND VACCINATION®

Dual Force® First Defense® has been proven to provide protection against scour-related sickness and death in newborn calves.

USDA & CFIA approved, colostrum-derived antibody preventing bacterial and viral scours.

First Defense antibodies are purified from cows on a commercial scour vaccine program. In order to reach consistently high levels of E. coli and coronavirus antibodies, these cows are also hyper-immunized with multiple rounds of ImmuCell's proprietary vaccine in the weeks leading to calving. This antibody rich colostrum is then collected, purified, concentrated, and titer levels standardized to guarantee a substantial level of E. coli and coronavirus antibodies in every dose.

Directions: Administer Dual-Force orally after birth. Remove cap, place tip at the back of the throat, toward the cheek pocket. Initiate the plunger and over a few seconds, slowly squeeze entire tube contents into the calf's mouth, ensuring the calf swallows all of the gel. Dual-Force can be administered at the same time as colostrum.

Protocol Tracker: Blue dye is non-digestible serving as a tracker through the system to ensure calf received treatment. First fecal stool after administration will be blue-green in color.

JEN OREILLY • INFO@J2FARMSUPPLY.CA • TEL: 780-581-9029

CROSS 5 CATTLE COOLERS

Keep Those Needles From Freezing:

The Cross 5 Cattle Cooler is compatible with boiling water or heat packs; boiling water will last longer and is more effective on those really cold days BUT boiling water makes the cooler a little heavier to carry than heat packs. The drain plug makes it easy to empty the water once your day is complete!

Boiling Water

On the "Holster Side" put about 1"-2" of boiling water in the cooler and seal the lid on top, **DO NOT** fill the entire compartment with boiling water. It is the steam that will warm each holster and help stop the needles from freezing. (Filling the cooler with boiling water will "BAKE" the Vaccine)

Heat Packs

Reusable Heat Packs are recommended to be placed in the storage (left side) of the cooler if needed.

It is important to return the syringe to the holster between each use to prevent freezing.

Keeping Your Products Cool In The Summer Months:

The Cross 5 Cattle Cooler is compatible with Loose Ice, icepacks Or Both!

Ice Packs

Ice packs are recommended to be use in the storage (left) side of the cooler. Ice packs VS loose Ice will minimise and peeling of labels or soggy box's that your vaccines are in.

Icepacks should be placed in each compartment that contains vaccines that need to be kept cool.

Ice

The holster side of the cooler can be kept cooler with Ice or Icepacks.

This is also a great place to keep extra drinks!

The capped holsters prevent any contamination between the Syringes and items stored underneath. The spacing between the holsters will fit most drinks and the spacing underneath the holsters will fit a standard size can.

Milk Replacer

KVS	DESCRIPTION	SIZE	RETAIL
034B20	Formula K - 20-12-10	20KG	\$87

* Milk replacer for Lamb, Goat, & Piglet is also available, As well as Milk Bites.
Please contact Jen for more information

Immu-Start

A powdered, immuno-globulin colostrum replacement. The immuno-globulins are of 100% bovine origin. It is designed to replace or supplement the colostrum milk received by newborn. Store below 24°C.

NOT ALL PACKAGES ARE EQUAL

Replacement VS Supplement

First Start 50

Aids in treating the failure of passive transfer in calves during the first 24 hours of life. Made with 100% natural bovine colostrum, contains 50 grams of IgG per dose and is CFIA approved.

First Start 100

Aids in treating the failure of passive transfer of immunity with 100 grams of bovine origin IgG in a 500 gram feeding. You can be assured that every batch receives the CFIA Veterinary Biologics Section's approval. Use as a bovine immunoglobulin source for a full colostrum replacer for beef and dairy calves.

Ideal's patented **D3 Detectable™** needles offer detectability, strength and sharpness. The detectable alloy added to the cannula of the D3 is proven 100% detectable in metal detection systems. The D3 has a thick wall cannula that will increase load strength and prevent bending and breaking up to 6 times over conventional needles. The D3 needles are ultra-sharp with a three-point precision ground tip for sharper cuts and easier penetration while staying sharp longer.

Cross 5 Cattle Coolers and oversized products do NOT apply

Cattle Rattle

A Canadian Innovation! The *Cattle Rattle* is made from high impact flexible plastic designed to stand up to the rigors of hard use in all temperatures. It features a rubberized grip handle for added operator comfort. Each rattle is filled with beads, over time the noise of these beads elicits a response from the animal before physical correction is needed.

Flag Whip

Flag Whips are a lightweight tool used to sort, load and unload cattle, pigs, and other livestock. Simply swish behind the animal to prompt them to move forward. These Flag whips are also consistently used in training for horses by desensitizing them with new stimuli without overwhelming them.

12" x 12" durable nylon flags are hand-attached to the end of a braided, flexible, fiberglass rod. Flag Whips feature 10" rubber golf grips, and shaft lengths of 60" and 72".
