## Confidence for calves with digestive upset.

An oral capsule containing essential oils and probiotics to support calves with digestive upset.

Calf Renova is the natural solution in an easy-to-use capsule that helps to clean the gut and restore beneficial bacteria. By quickly addressing enteric health issues recovery support is provided and any slowdown in calf growth can be minimized.

### Calf Renova:

- 4 Maintain balance of healthy gut microflora
- 4 Stimulate feed intake
- 4 Use at first sign of digestive upset
- 4 Support immune function

Use at **FIRST** signs of digestive upset to maintain balance of healthy gut microflora.

**Be proactive!**

### Directions for Use:

Administer 1 capsule per calf for up to 3 days:

- At first signs of digestive upset
- Upon receipt of incoming calves

Administer 2 capsules for severe digestive upset situations, and repeat with 1 more capsule after 24 hours, if needed.

## Key ingredients working together to support a healthier calf

### 1 Essential Oils

Provides powerful antimicrobial activity that helps to clean the gut and lessen severity of digestive upsets

### 2 MOS

Binds and flushes pathogens from gut to help promote gut integrity and enhanced immunity

### 3 Direct-Fed Microbials

Inhibits pathogen growth and repopulates the gut with beneficial bacteria

*Calf Renova is an easy-to-use capsule containing a unique combination of natural ingredients that work to provide intestinal and immune support — potentially reducing the need for antibiotics.*

TechMix

Redefining hydration  
to keep animals  
drinking, eating &  
producing.

### A supplement to help support newborn calves.

Birth is a stressful time for calves – difficult births and calving into cold environments add to that stress. It is critical to get these calves on their feet and eating. Calf Perk® is an easy to use, immediate energy boost for newborn calves that naturally increases body temperature and respiration rates to perk them up. Formulated with the help of industry experts, Calf Perk's unique, patent pending formulation ensures rapid absorption, maximizing its effect. For results you can see, choose Calf Perk!

### FEATURES & BENEFITS

- Concentrated, easy to use
- Quick absorbing, fast acting
- Naturally increases body temperatures and respiration rates in newborn calves
- Enhances calf vigor and suckle reflex
- Based on recommendations from human medicine for infant support
- Unique energy source
- Research demonstrates no negative effect on immunoglobulin absorption

### WHEN TO USE

- Newborn calves that need a boost
- After a difficult birth
- During cold temperatures
- Depressed, lethargic calves

\*\*\*\*IN STOCK \*\*\*\*

### DIRECTIONS FOR USE

Shake well before use. Give a single tube of Calf Perk orally across the tongue no more than 30 minutes prior to colostrum or milk feeding.

KVS	DESCRIPTION	RETAIL
376-044	Kerbl Calf Resuscitator	\$190

### HK Calf Resuscitator

The HK Rheintechnik calf resuscitator looks like a large air pump. The suction cup is placed over the calf's nose and mouth.

1. Mucus is removed from the respiratory tract in one powerful stroke.
2. The mucus is expelled from the pump, then air is pumped into the airways. The lung's lobes and alveoli can unfold.

## First Defense® Bolus and Dual-Force® Gel Tube for Calf Scours Prevention

An immediate guaranteed dose of immunity against E. coli and coronavirus infections, in a bolus or single-dose gel tube.

Instantly deliver the passive antibodies newborn calves need to prevent scours. Jump straight to antibody protection while removing reliance on the common variable vaccine response of dam- and calf-level vaccines. One dose, a single bolus or gel tube, administered at birth gives each calf a guaranteed level of protection from E. coli and coronavirus infections.

## SCOUR TREATMENT & PREVENTION

KVS	DESCRIPTION	SIZE	RETAIL
791-003	First Defense	5s	\$70.00
791-001	First Defense	30s	\$390.00
791-002	First Defense Dose Gun		\$5.00
791-005	Dual Force	12s	\$215.00

### DUAL-FORCE PASTE ONLY

#### Protocol Tracker:

The blue dye in the paste is non-digestible serving as a tracker through the system to ensure the calf has received treatment. First fecal stool after administration will be blue-green in color.

**NEW**

## Antibody Driven Immediate Immunity™ Against Bacterial & Viral Scours

K99+ *E. coli*

Coronavirus

12 single-dose gel tubes per box

Store refrigerated

### VERIFIED ANTIBODIES

Equally protected calves

- Improved survival
- Less treatments
- Decreased environmental contamination / Reduced pathogen shedding by calves

### CALF-LEVEL ADMINISTRATION

Targeted investment

- One Dose=Immunity
- No wasted costs on DOA's or calves not valuable to the operation

### IMMEDIATE IMMUNITY

No vaccination stress

- Removes a shot from the vaccination protocol allowing cows to maximize response rate to other vaccines
- No risk of late-term abortions or endotoxin loading

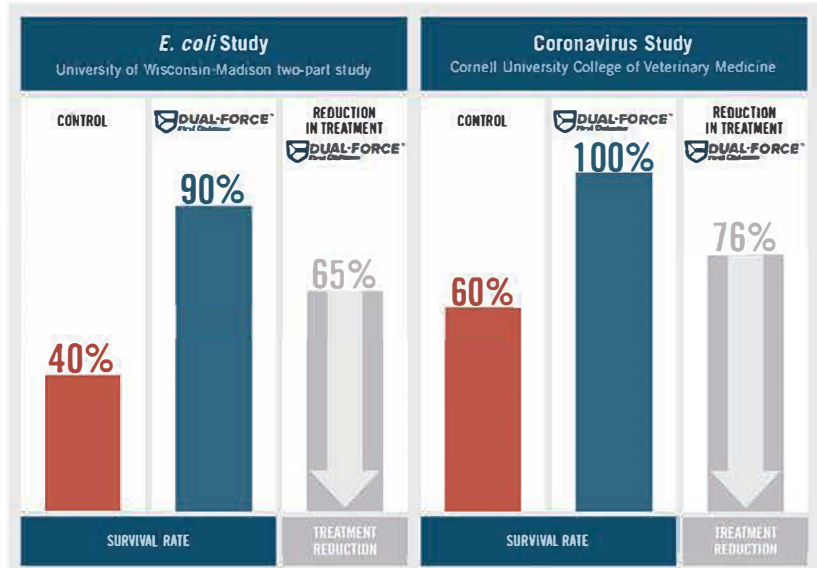

### EASY TO ADMINISTER

Full benefit for your money

- Vs. oral modified-live vaccines which are 100% inactivated when administered w/ colostrum, 90% inactivated when colostrum is delayed 30 minutes
- Vs. dam-level scour vaccines which are ineffective when there is protocol drift

# GO BEYOND VACCINATION®

Dual Force® First Defense® has been proven to provide protection against scour-related sickness and death in newborn calves.

USDA & CFIA approved, colostrum-derived antibody preventing bacterial and viral scours.

First Defense antibodies are purified from cows on a commercial scour vaccine program. In order to reach consistently high levels of E. coli and coronavirus antibodies, these cows are also hyper-immunized with multiple rounds of ImmuCell's proprietary vaccine in the weeks leading to calving. This antibody rich colostrum is then collected, purified, concentrated, and titer levels standardized to guarantee a substantial level of E. coli and coronavirus antibodies in every dose.

**Directions:** Administer Dual-Force orally after birth. Remove cap, place tip at the back of the throat, toward the cheek pocket. Initiate the plunger and over a few seconds, slowly squeeze entire tube contents into the calf's mouth, ensuring the calf swallows all of the gel. Dual-Force can be administered at the same time as colostrum.

**Protocol Tracker:** Blue dye is non-digestible serving as a tracker through the system to ensure calf received treatment. First fecal stool after administration will be blue-green in color.

# 2022 OB PROMO

**StockmansChoice®**

2 YEAR EXPIRY DATE

## SPECIALLY FORMULATED FOR LIVESTOCK

Delays in immune development in ruminants can make calves prone to diarrhea and upper respiratory diseases between birth and weaning. This can lead to lower growth rates, which leads to significant economic losses for the farmers. Studies have shown that the use of probiotics can counteract these factors and reduce the incidence of disease in beef calves while also promoting growth.

## PREMIUM CALF COAT

At temperatures below +10 C° the risk of illness increases. The Kerbl Premium Calf Coat provides protection against sudden changes in weather, avoiding cold stress in new born calves. Calf blankets support the immune system during the first few days, however calves generally wear calf blankets for 3-4 weeks. Calf blankets are not suitable for group housing.

- Back length: 80cm
- Maintains heat through PU foam layer
- Extremely water-resistant (up to a 5,000mm water column) and breathable 4-layer material
- Soft and sturdy
- Excellent fit and flexible size adaptation thanks to adjustable flexible belly guard, leg strap and Velcro fasteners on the chest
- Machine washable at 30 C°

## CROSS 5 CATTLE COOLERS

### Keep Those Needles From Freezing:

The Cross 5 Cattle Cooler is compatible with boiling water or heat packs; boiling water will last longer and is more effective on those really cold days BUT boiling water makes the cooler a little heavier to carry than heat packs. The drain plug makes it easy to empty the water once your day is complete!

#### **Boiling Water**

On the "Holster Side" put about 1"-2" of boiling water in the cooler and seal the lid on top, **DO NOT** fill the entire compartment with boiling water. It is the steam that will warm each holster and help stop the needles from freezing. (Filling the cooler with boiling water will "BAKE" the Vaccine)

#### **Heat Packs**

Reusable Heat Packs are recommended to be placed in the storage (left side) of the cooler if needed.

It is important to return the syringe to the holster between each use to prevent freezing.

### Keeping Your Products Cool In The Summer Months:

The Cross 5 Cattle Cooler is compatible with Loose Ice, icepacks Or Both!

#### **Ice Packs**

Ice packs are recommended to be used in the storage (left) side of the cooler. Ice packs VS loose Ice will minimise and peeling of labels or soggy boxes that your vaccines are in.

Icepacks should be placed in each compartment that contains vaccines that need to be kept cool.

#### **Ice**

The holster side of the cooler can be kept cooler with Ice or Icepacks.

This is also a great place to keep extra drinks!

The capped holsters prevent any contamination between the Syringes and items stored underneath. The spacing between the holsters will fit most drinks and the spacing underneath the holsters will fit a standard size can.

# QuietWean

## HEALTHY

Producers have found that **QuietWean** nose tags reduce “shipping fever” and respiratory infections

## EFFICIENT

Successful, low-stress weaning can be accomplished in only 4 – 7 days

## BENEFICIAL

Calves weaned using **QuietWean** spend 25% more time eating, 95% less time bawling and pace up to 15 miles less than traditional weaning!

## RE-USABLE

**QuietWean** tags can be used again and again, making them very economical

	1"	IM	SMALL ANIMALS

## D3 DETECTABLE NEEDLES

Ideal's patented **D3 Detectable™** needles offer detectability, strength and sharpness. The detectable alloy added to the cannula of the D3 is proven 100% detectable in metal detection systems. The D3 has a thick wall cannula that will increase load strength and prevent bending and breaking up to 6 times over conventional needles. The D3 needles are ultra-sharp with a three-point precision ground tip for sharper cuts and easier penetration while staying sharp longer.

KVS	DESCRIPTION	PKG	RETAIL
034-230	16" x 5/8"	10s	\$7
