

# OMEGA

DUAL PUMP BATTERY BACK-UP SYSTEM

**PROTECT  
YOUR  
BASEMENT**

**4,960 GPH!  
AT 10'<sup>FT</sup>**

**MORE POWER**

**MORE FEATURES**

**MORE PROTECTION**

The Omega is a high performance dual pump battery back-up sump pump system designed to prevent basement flooding in the most extreme conditions. The Omega system has the pumping power to tackle the heaviest rains and the efficiency to outlast the longest storms.

**SUMPOTEK**

## SMART OPERATIONS

The Omega system stays proactive by monitoring itself 24/7 and self testing once a week. It will alert you whenever it detects the threat of flooding long before ground water ever reaches your basement.

## POWERFUL PUMPING

The Omega system's high output pumps move more water and has the highest pumping capacity. The Omega provides maximum protection against severe conditions.

## EFFICIENT EXTENDED RUNTIME

The Omega system will run for days and even weeks at a time in battery mode to give you extended protection and a dry basement even during long power outages.

## SMART CONTROL

The Omega's intuitive control is completely digital, having more critical features and functionality, it protects your basement in ways that other systems can't.

**MONITORING AND SELF-TESTING** The controller is constantly monitoring the water level, power status and battery voltage 24/7. It also operates the pumps and runs a complete diagnostic test of the entire system once a week to ensure your Omega is ready and your basement is protected.

**ALERTS** More alerts equals more protection! The will alert you whenever it detects the threat of flooding caused by power failure, primary pump failure, bad battery, high-water, and much more.

**EASY TO READ DISPLAY** The LCD screen clearly displays the status of the system and alerts making it easy to use even in the dark.

**WIFI** You can get text and email alerts from your system anytime and anywhere with the optional Wi-Fi module, its easy to set up with no usernames or passwords. Monitoring is free and so is the peace of mind knowing your system is connected.

# PROTECT YOUR BASEMENT

## PUMPING CAPACITY

HEAD	GPM
5'	7,340
10'	4,960
15'	3,260

## BATTERY RUNTIME (Dual Battery)

CYCLE	OPERATION
Continuous	5.5 hrs
2 Minutes	70 hrs
5 Minutes	168 hrs

## DUAL SENSORS

The Omega system utilizes two proprietary solid state sensors to operate both pumps. The pump sensors are as simple as they are reliable. These sensors have no moving parts to fail or get hung up and last 10x longer than traditional float switches. Our sensors digitally communicate the water level directly to the controller. Not only do they turn the system on and off, the top sensor also acts as a high water alarm and will continue to operate the pump even if the lower sensor fails.

## HEAVY DUTY DUAL DC PUMP

The Omega uses dual high output energy efficient DC pumps to achieve the highest pumping capacity in the industry. The Omega's smart controller will only turn the second pump on when needed to extend the life of the batteries for a maximum runtime. By design the pumps use the water being pumped out to cool the motor for a longer service life and added protection. The pumps are pre-assembled and include all the necessary piping and check valves for a perfect install everytime.

## CHARGER & BATTERY BOX

The Alpha uses a processor based smart charger capable of charging AGM, Gel, and Standard type deep cycle batteries.

Our heavy duty plastic battery box is designed to protect the battery from environmental conditions. It can house up to a group 27 deep cycle battery.

# ACCESSORIES

## Wi-Fi MODULE

The FloodProtext Wi-Fi Module gives the Omega system the ability to send emergency text and email notifications whenever it detects the threat of possible flooding.

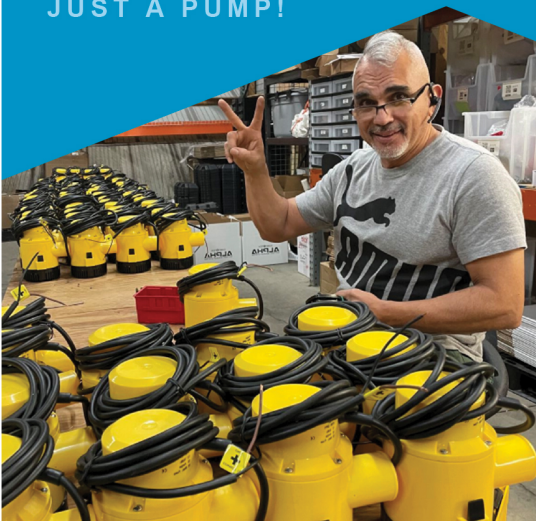

## DUAL BATTERY KIT

You can double the run time of your Omega system by adding a second battery. The Omega Dual Battery Kit has everything you need for twice the protection against extended power outages.

## ABOUT US

IT'S MORE THAN  
JUST A PUMP!

Ironically, SumpTek started in a basement in 2014 with the vision of producing extremely reliable and innovative sump pump equipment. Equipment that uses technology to prevent basement flooding, thus the SumpTek name.

Today SumpTek is a family owned and operated company rooted in the Midwest. Our values run deep throughout our culture. We serve each other, so we can serve our customers, that starts from the top down. We all roll up our sleeves to get the best possible product protecting your basement.
