

How to repair a RuXXac-Cart with outstanding wheels

Models: Light / Special

To repair your RuXXac, please follow the instructions below:

- 1. Unfold the handle and the platform.**
- 2. Push the sidewise outstanding wheels onto the platform (as far as possible).**
- 3. Lay the cart down with the platform facing up.**
- 4. Push the wheels further to the frame.**
- 5. Fold in the platform slowly but with power.**

During that move it may seem as if the solid rubber of the wheels is deforming, but this can not happen, so no worries. The wheels will then jump back into their correct position.

Your RuXXac-Cart should now be ready to use again.

For the future, please be sure to always unfold the wheels before the platform.

Best regards
