

SEPL

Environment, Health & Safety Policy

SEPL is committed to operating the business in a manner which is environmentally sustainable and safe for all SEPL's contractors to do their job.

Every SEPL and every contractor performing work on behalf of SEPL shall bear a personal responsibility for the following objectives:

Ensure health and safety of each other

Maintain safe and healthy working conditions, educate and train SEPL on appropriate occupational health and safety practices, implement sound emergency procedures and measures to prevent work related accidents.

Minimize environmental footprint

Conserve energy, consume natural resources responsibly, adopt a Reduce, Reuse and Recycle philosophy, ensure safe disposal of waste, and procure with due focus on environment to minimize SEPL's overall environment footprint.

Compliance to standards

Comply with all applicable environmental, health and safety requirements for all SEPL activities including legal or regulatory requirements and our clients' policies and procedures.

Demonstrate leadership

Know what is expected, set an example, raise awareness, and influence stakeholders and suppliers to safeguard the environment, and act promptly and responsibly to correct conditions that may endanger health, safety, or the environment.

Continually improve

Strive to continually improve SEPL'S environment, health and safety management system performance through prompt reporting, corrective and preventive actions, training and the provision of appropriate resources to fulfill the objectives.

All SEPL's contractors must support this commitment and escalate any environmental, health, or safety concerns to their managers for prompt action.
