Join me as we bring things back to basics. How many times have you stopped painting because you were not progressing. Or have never tried because you were overwhelmed and didn't believe in yourself.

Even if you have never painted before but, have always wanted to, or do paint and would like to develop more.

This is the workshop for you.

Whether you're a complete beginner or intermediate let me show you how to simplify the processes of watercolour painting with some simple tools and techniques that will help you create wonderful watercolours you can take home with you.

All levels are welcome.

Refreshments provided.
