

PURE. LIVE. MICROGREENS.

BEYOND
ORGANIC!

A BETTER WAY TO BUY YOUR MICROGREENS.

PURE and **LIVE** are more than just words. It's the basis of our system. Pure Green Growers are certified in City-Hydro's **PURE** System.

What is the **PURE** system?

It starts with the seed:

- We use tested and certified **PURE** organic seed from only 2 suppliers
- Grown on natural coconut coir mats, that meet the **PURE** standard
- Watered with **PURE** filtered well water
- Cared for with **PURE** certified food grade trays, containers & equipment
- Nature provides the seed with all it needs. (Just like an egg.)
- No dirt, no pesticides, and no chemical fertilizers. (It's NOT needed!)

If it touches our seeds or our greens, it's **PURE** and food grade. Period.

Finally, **PURE** greens are delivered to you live (yes, **LIVE**) and uncut! No more wilted, browning greens. No more food waste. Just **PURE** microgreens as beautiful, fresh and nutritious a week later as they were the day they were delivered!
