# BEVERAGE

## PROFIT AUDIT

### WHY AUDIT?

Over the last decade, we have audited thousands of beverage retailers and have found an unbelievable level of lost profits in their draft beer, wine by the glass and soda programs. Retailers have become accustomed to foamy or flat beer, wine waste and uncalibrated soda systems, but these profit wastes can be solved easily by a trained beverage consultant. Stop wasting \$

# Draught Beer System Audit

**BEVERAGE AUDIT PROFESSIONALS**

*Our Beverage Auditors are trained to understand every aspect of a draft beer system. From installation to troubleshooting. This knowledge allows them to determine the cause of waste within a beer system. A wine by the glass program can be the most profitable program at a bar if a retailer understands portion control and preservation. Our review will determine metrics that need to be implemented. A fountain soda system's cost is the syrup and the proper brix is the answer.*

*Audit Cost is based upon size and scope.*

*Complete Audit \$299*
