

## **Field entry process**

The main gate should be open on your arrival at the field. If the gate is closed please park up in the lay-by just past the entrance and wait for the customer using the field to fully exit the car park.

Once the car park is free drive in and park on the hard standing.

Close and chain the main gate – this is very important as it ensures no one enters the car park until you have exited.

Once the gate is secured you can let your dogs out of your vehicle.

The entrance to the field is via the pedestrian gate which is on your right as you enter the car park.

There is a keypad lock on the pedestrian gate. Please enter the code sent via email and text. Please note the code always starts with the letter C.

Once the code is entered turn the knob clockwise and push gently on the gate at the same time.

## **Field exit process**

To exit the field pedestrian gate pull the black pad on the gate toward you (no code is needed to exit the field)

Once your dogs are back in your vehicle open the main gate fully and attach it to the fence using the chain and hook

Check that the pedestrian gate to the field is closed properly – pull the gate towards you ensuring the bolt has clicked into place.

Exit the car park
