

RENAISSANCE

CONCRETE CHEMICAL STAIN

RENAISSANCE™ Concrete Chemical Stain reacts chemically with the mineral content of the concrete surface – penetrating deeply and permanently. The results are unmatched by any other process and renders the wonderfully natural appearance of aged stone.

Finally, there's an effective solution you'll be proud of for finishing new or old concrete.

There is simply no better way to embellish new or old concrete. RENAISSANCE™ Concrete Chemical Stain evokes an Old World, rustic charm that imparts an inviting sense of appeal unique to any other finishing method.

Easy maintenance suits today's active lifestyle!

An excellent choice for high traffic areas inside or outside. Just a damp mop makes quick work of most stains and spills.
