

Be as creative as you want without worrying about the expense!

Create your own custom designs without being inhibited by cost constraints. Each concrete slab, new or old, yields a distinctive mottled effect that replicates the look of terra cotta tile, marble, or limestone with remarkable accuracy. Perfect for interior on-slab construction, basement floors, restaurants, pubs, patios or garages... the possibilities are endless!

Your color choices are etched in concrete!

Choose one of our many colors carefully. Because of the deep chemical reaction with the surface of your concrete slab, RENAISSANCE™ Concrete Chemical Stain will not wear off like paints and other stains.
