

# Pallet of Bags

Pallet and Bags arrives unpainted with a frosted, white ultra detail finish only. (2-pieces)

## Finish Instructions:

1. Cut off and dispose the frame connecting the bags and the pallet.
2. Spray the bags a color of your choice and the pallet a light brown or tan with a paint that bonds to plastic. (I use Rustoleum 2x Ultra Cover)
3. Let both pieces dry well.
4. Print this page on glossy photo paper. You have a choice of Salt or Cement.
5. Cut out the number of logos you need and simply glue them onto each bag using a white, clear drying glue. I use Elmer's white glue with a mini Q-Tip and a pair of tweezers. All of the emblems are the same and sized to fit this model. Notice that two of the logos must be cut to fit in the second row.
6. Glue the bags onto the pallet with the same glue as above.
