How to Finish Handicapped Parking Signs

How to Finish Handicapped Parking Signs

Paint Signs
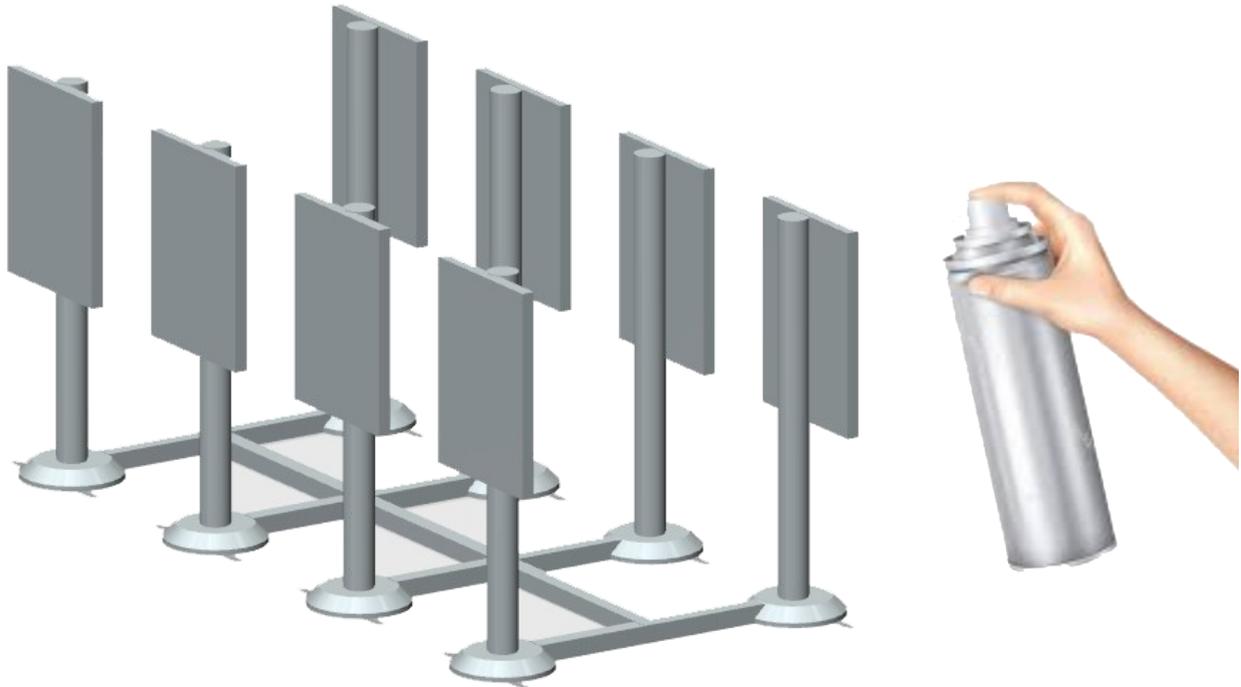

- **Spray entire sign assembly with a grey or aluminum color paint.**

How to Finish Handicapped Parking Signs

Cut Away Sprues

Sprue

- **The signs are jointed together to keep the printing cost down by "sprues" which are similar to part frames of plastic model kits.**

- **Use a small pair of side cutters and carefully cut each sign away from the sprues at the base edges.**

How to Finish Handicapped Parking Signs

Paint Signs

- **Use a small brush to paint the front of each sign white. (Optional)**

- **Then, paint the sign base the color of the surface to be mounted (i.e. sidewalk gray, asphalt black, etc.) (Optional)**

- **Set signs aside to dry.**
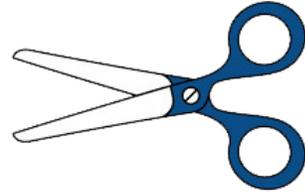

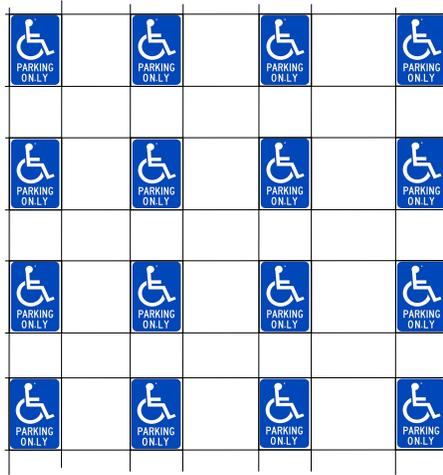

● **Print this page on glossy photo paper.**

● **Cut out each handicapped emblem, above, with a sharp pair of scissors. Cut along the vertical and horizontal lines.**

● **Set cutouts aside.**

How to Finish Handicapped Parking Signs

Glue on Decals

+

- **Use a small brush or swab to coat each sign face with a moderate film of white glue.**

- **Align and affix Handicapped emblems that you cut out on page 5 onto each sign front.**
