## Cash & Carry and Warehouse EPOS software

itdlogisoft EPOS software has been designed and developed specially for Cash & Carry Stores and Large Warehouses. With an easy to use intuitive interface, it is designed to be both fast and user friendly for the operative.

ITD Software prides itself in tailor making real solutions for it's clients, assuring them of increased profits together with total customer satisfaction, and all at very competitive rates.

itdlogisoft manages all aspects of warehouse operations, providing control and up to date management information across all areas. Simply, it can increase Warehouse profits by controlling data such as stock receipts, stock locations, picking and dispatching goods.

Marrying together world class software with some of the best hardware available today we create industry specific systems that are tailored to the individual business. For hardware we partner with all top brands including Aures and Sam4s, and we have access to all makes of system peripherals.

itdlogisoft is a stable and proven PC based application which is scalable from 1 to over a 100 users. It is flexible and modular, easy-to-use and is easily expandable to the internet and Radio Frequency applications. The translation module means that it is particularly suited to bonded warehouses and other warehouse industrys.
