WHAT CAN PRO-TEK DO FOR YOU

Lifetime Spray on Roof process

Pro-Tek LLC's lifetime sprayed on RV roof will offer you protection like no other.

In our process, we prep the fiber glass or metal roof getting it ready to spray our lifetime coating. Rubber membrane roofs are stripped to the wood substrate then prepped for lifetime coating. All vent flanges, plumbing flanges, etc. are molded into our lifetime roof. Camco vent covers are added at no extra cost and are sprayed with the lifetime coating.

Our lifetime roof coating is sprayed at 3/16" thick. It is seamless and wrapped down into the drip edge as well as the front and rear seams. New A/C gaskets are added before the A/C is reinstalled.

Once completed, your RV will be virtually maintenance free. No more Caulking! No more streaks! No more headache!

Our process is insurance approved, increases your resale value, and has a lifetime transferable warranty.

LIFETIME RV ROOF:

Can be applied to RV's, Enclosed Trailers, Horse Trailers, Box Trucks, roofs of Wood, Metal, and Fiberglass Structures. It is a Specialized formula with abrasion resistance, water proofing, corrosion protection and much more.
