

Boilerhouse Management Plan

Industrial Technical Solutions offer bespoke boilerhouse management plans (BMP) to improve standards and compliance within your systems.

Documentation and systems are developed to suit your assets with monthly reports, planning and maintenance management all available. This flexible solutions allows engineering managers to focus on production related issues, with piece of mind that the boilerhouse is in the capable hands of an experienced & qualified professional.

Our 2 standard packages (Essentials & Premium) can be developed to meet your exact requirements.

Overview: Our Boilerhouse Management Plans are based on an annual contract with an agreed number of days to deliver the package required. These days will be a combination of on site and off site (for admin/documentation), spread across the contract period to ensure the scope of work is delivered efficiency and effectively.

ESSENTIALS

- ⇒ 12 days resource per annum
- ⇒ Boilerhouse audit
- ⇒ Technical Risk Assessment
- ⇒ Review of existing procedures
- ⇒ Log book audit and review
- ⇒ Critical Spares review
- ⇒ Boilerhouse management file repository
- ⇒ Technical Support

PREMIUM

- ⇒ 24 days resource per annum
- ⇒ All Essentials benefits plus
- ⇒ Monthly report on boiler performance, water treatment trends, steam generation, utility consumption (subject to info available).
- ⇒ Critical spares stocking proposal
- ⇒ Bespoke log book development
- ⇒ Development of maintenance schedule
- ⇒ Creation of full suite of procedures

ADD ONS:

- ⇒ **Annual maintenance scheduling and management.** Take the strain away from planned maintenance planning and coordination, allowing you to focus on production while we take care of all sub-contract scheduling, planning and on site works.
- ⇒ **Service Contract review and tendering.** Allow to us review existing service contracts and scope of works to ensure you are receiving the right package. We can tender on your behalf and present alternative solutions if required.
