There are 10,773 writer teams. Members of writer teams are listed in alphabetical order by last name. Song scores are shown and the writer team score is the simple sum of those scores.

Writer Teams are scored by awarding the full song credit to the entity to which it is attributed, regardless of the number of writers on the team rather than dividing it, as is done in the Writers section. In Writer Teams scoring “Paul Simon” as a single-member team is treated in the same way as two-member team “Mick Jagger/Keith Richards” because credit is not allocated to individual writers.

Each writer team’s attributed songs are shown in order of chart strength, beginning with the strongest. The song catalog is shown only for multi-writer teams in this section. While single writers are listed for rank, their song catalogs are found in the Writer Index.
