

Why do I have to pay you 15 percent?

The services Linqqs provides are not simply filling out forms on your behalf. The ERC is highly complex, and it's beyond the scope of knowledge for the average

CPAs and tax professionals. That's why our team is comprised of legal and tax experts with decades of experience.

Your Linqqs credit claim process includes:

- **Complete guidance on the claim process and documentation**
- **Specific payroll, tax, and legal experience with thousands of ERC cases enables us to understand and interpret the details of your claim**
- **Fast and smooth end-to-end process, from eligibility to claiming and receiving refunds**

In creating and submitting your claim, we create documentation to ensure your filing goes smoothly once it reaches the IRS. We address issues such as:

- **What are the differences between the 2020 and 2021 programs, and how does it apply to your business?**
- **How does the PPP loan factor into the ERC?**
- **What are aggregation rules for larger, multi-state employers?**
- **How do each state and municipality's executive orders apply to your business?**
- **How do part-time, Union, and tipped employees affect your refund amount?**
- **Can health insurance expenses be claimed as part of the credit?**

And many other factors that interact to make up your claim. Our tax and legal experts understand better than anyone how to access these funds for you. Our

success rate is 100%, and our team has helped over 2,000 businesses receive over \$400 million in credits.

My accountant can do this for less, why should I choose you?

Our team has the expertise and maximize the credit while staying safely within IRS guidelines. It's a delicate balancing act that calls for professionals with decades of experience dealing with the IRS. Our results speak for themselves: Linqqs clients receive 10-20% more funding than people who work with a CPA not familiar with the program.

The Linqqs program also includes audit assistance: we stand by our work and will supply all criteria and assist in responding to the IRS in case of an

audit. We will aid you in substantiating your ERC eligibility to the IRS if it is questioned in the future. If you choose to work with a service provider that lacks our level of focused expertise, you run the risk of being unable to defend the credit, and the result would be the IRS returning the credit with a 20% fee. We've successfully submitted thousands of credits, so our team knows how to craft substantiating evidence to ensure the credit is approved.
