

Integrate RIASEC into Performance Tasks

What is GRASPS?

GRASPS is a model for demonstrating performance of understanding using authentic assessments. It is one of many performance of understanding models, but is ideally suited to the kind of project-based inquiries we do in design. GRASPS represent a framework for organizing, delivering, and assessing a project-based assessment. The assessment associated with the inquiry is structured around the following expectations and goals.

- Goal: A definition of the problem or goal
- Role: Define the role of the student
- Audience: Identify the target audience
- Situation: This is the context or scenario of the goal
- Product: What is created and why it will be created
- Standards: Success criteria and why they will create it

Possible sentence starters

GOAL: Your goal is to ____.	
ROLE: You are a ____ (job title).	
ACTIVITY: Your tasks are ____.	
SITUATION: The scenario is ____.	
PRODUCT: Your product will include ____.	
STANDARD: You will show how you mastered ____.
