The Art of Decorative Glass

# ABOUT DSA

Headquartered in Hong Kong, China, DSA Glass is specialised in producing architectural and decorative glass. We supply mainly residential glass, commercial glass, shower doors and toilet cubicle system etc.

DSA Glass serves numerous customers including listed property developers like Sun Hung Kai Property, Henderson Land, Hang Lung Group and world known architect and interior design firms like HBA, Wilson Associates. Glass projects cover hotels, clubhouse, residential, commercial, shopping mall & retail. We aim at delivering total solution and quality products to our valued customers.

# ABOUT ASG

Having been established in Australia for over 20 years, ASG has become one of the largest suppliers of architectural glass by adhering to our philosophy of satisfying the customer. Our success is built upon understanding our customer s' needs and maintaining stringent manufacturing standards, while ensuring energy efficiency is optimised in contemporary Australian building innovations. We are passionate about helping shape Australia's landscape, and to supply quality products and excellent service to all our customers.

ASG is DSA's exclusive distributor in Australia and New Zealand.

# OUR FACTORY

DSA Glass possess an advanced factory of over 12,000 sq meters in China supporting a monthly production capacity of 20,000 sq meter of glass. DSA's high product quality and productivity are attributed to our emphasis of superior raw material quality and the dedication and craftsmanship of our well-trained glass workers with more than a decade of professional experience. Our factory received ISO 9001 and ISO 14001 in Nov 2016.

# SMART GLASS

# SMART GLASS

---

DSA's Smart Switchable Glass (SSG) is a composite of multi-layers with a Liquid Crystal Sheets sandwiched in the middle. SSG units are resistant to impacts, a characteristic that makes them exceptionally safe products for a variety of applications. As SSG is laminated glass, pieces of glass are securely bound together and fragments are prevented from spreading should a breakage occurs.
