

# hyperSwitch

## What is hyper Switch?

Our hyperSwitch Glass provides an unforgettable experience, at the flick of a switch, It can change its appearance from opaque to clear, giving you privacy or clear views on demand. This high-tech feature is creating privacy solutions in modern offices, residential homes, hospitals, universities, government buildings and banks across Australia and around the world.

## How?

When the electrical supply is switched on, the liquid crystal molecules align, incident light passes through and the Privacy Glass panel instantly clears. When the power is switched off the liquid crystal molecules are randomly oriented, thus scattering light and the Privacy Glass becomes opaque (private).

## Where?

The hyperSwitch privacy glass has a wide range of applications:

- Commercial
- Healthcare
- Residential
- Education
- Luxury
- Marine
- Retail
- Entertainment

## Specifications

Visible light	- 81%(ON) 50%(OFF)
UV Blocking	- 98%
Dimensions(Single)	- 1800mm*3660mm
Thickness	- 10mm/12mm/16mm
Voltage	- 48V/65V
Power	- less than 4W/m <sup>2</sup>
Acoustics	- 35 dB
