

PUBLIC TRANSPARENCY REPORT

2023

Avellinia Capital Limited – AvCap

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

As an integral part of AvCap's business principles, we are committed to promoting responsible investment practices. Sustainability is a core component of our business strategy and underscores our approach as long-term investors.

We believe that investing responsibly can achieve equal or better long-term returns compared to non-responsible investments. In addition, we believe that it is better aligned with the goals of all our stakeholders, including investors, our team, portfolio companies, and others.

We aim to address ESG issues appropriately at all stages of the investment cycle and our investment process.

This includes originating new investments, conducting due diligence in connection with investments, as well as implementing regular monitoring to ensure consistency with ESG standards, and engaging with counterparties to improve ESG issues.

We recognize that when investing in granular portfolios with large numbers of underlying obligors, it is often not possible to perform deep diligence on ESG issues on every underlying obligor. However, we do recognize the importance of considering ESG issues and reminding our counterparties to consider such issues. We believe that by doing so we will achieve positive outcomes and effect positive change. To aid transparency, ESG issues may be specifically addressed in reports prepared by us or the Investment Vehicles or its counterparties and may be discussed at meetings with investors.

We oblige every portfolio company to undergo a detailed ESG audit via third-party provider omnevue.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Our investees are largely young (Seed round to Series A) companies in the technology/digital space with operations in Western Europe. In many cases, they provide financing to small businesses or individuals who may otherwise be excluded from the financial sector. Investees who have passed the Series B stage tend to be large enough to have ESG processes implemented, here ESG targets may be included in the legal documentation. For ESG-related data collection and analysis, a three-step approach is taken:

- 1) Collection of comprehensive data from the investees to enable quantitative monitoring of ESG factors
 - 2) sharing of quantitative results with the investees
 - 3) mapping of quantitative results against a benchmark and target to identify areas of improvement and possible action points
- Concretely, eight environmental, fifteen social, and eight governance criteria are measured for each investee.

Of these, three were not applicable, leaving 28 to be benchmarked.

13 of the 28 benchmarks were met by 85% or more. The outcomes which did not meet expectations were to a large degree not within the typical focus of early-stage companies such as the provision of external training to employees, the number of external board directors, energy-efficient vehicles, or supply chain ESG. These can likely be addressed as investees grow.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We are pursuing further and deeper integration of ESG criteria in all stages of the prospecting, due diligence, investment, and monitoring phases of our portfolio investments, in particular as more of the criteria are becoming quantifiable and are being monitored on an ongoing basis, allowing for stewardship based on measurable criteria rather than just qualitative assessments.

We are looking into integrating ESG reporting into our internal portfolio and risk reporting, as well as our regular investor reporting.

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

The Investment Committee takes ESG factors into consideration during origination, underwriting, and diligence and may prioritize certain investments over others based on ESG factors. A service provider evaluates all investees against a common scorecard. Prioritisations may happen based on the results of those initial assessments, as well as periodic follow-ups/monitoring.

PGS 27	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How are your organisation’s stewardship activities linked to your investment decision making, and vice versa?

Where possible, ESG principles and goals are codified in investment documentation and are thus an integral part of the investment decision process. In other cases, stewardship activities are based on initial and ongoing assessment of the relevant factors, e.g. as monitored by the quantitative and qualitative scorecards assembled by an external service provider.

STEWARDSHIP: EXAMPLES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 40	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Examples	2

Provide examples of stewardship activities that you conducted individually or collaboratively during the reporting year that contributed to desired changes in the investees, policy makers or other entities with which you interacted.

(A) Example 1:

Title of stewardship activity:

Establishment of ESG framework for newly launched SFDR Article 8 fund

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Working with the fund's external AIFM, we identified external service provider omnevue to perform an ESG audit on all investee companies. It was agreed with all investee companies to undergo the audit process. This obligation now forms part of the legal documentation of all new transactions.

All investee companies were benchmarked against ESG factors and scorecards. Results were communicated to investee companies in order to provide them with a status quo and to show areas for improvement.

(B) Example 2:

Title of stewardship activity:

Investment in mobility company

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager
