

# Covid Protocols Reopening New York

## Safety:

Safety is my highest priority and changes have been made based on NYS and CDC guidelines. I ask that you please help to follow these guidelines during your session. Cleanliness, physical distancing and reduced contact are very important as we transition back to normalcy. Your session will be a bit different than previous sessions but we will get through it together and recreate a safe and healthy environment for you.

## Things you should know:

Unfortunately I need to limit the workforce and customers present. I understand guests would like to be present during your shoot however at this time I can not accommodate an influx of guests that are not scheduled for service. This protocol is waived when a minor is present.

Please wait in your car when you arrive. I will text you when I am ready to start your session.

Additional time between sessions will be scheduled to allow for additional disinfecting. This is especially important when a client is scheduled before you.

**Please be courteous of the public's health. If you or anyone in your household has a temperature over 100.4 degrees or Covid like symptoms please contact me to re-schedule. Reschedule fees will be waived as a one time courtesy per session.**

Before you leave home, please check temperatures of everyone coming to your session, including yourself as an extra layer of protection. Mask and protective gear will be worn by myself.

Temperature screenings are required prior to your session. Soap will be available at your session for free.

Your contract will now include an additional Cover Liability Waiver. Don't be alarmed. This is to protect myself and any associates during your session.

\*Please note this is a fluid situation and may change based upon governmental directives, CDC and WHO recommendations and legal advisement.
