Notes: This building is 2500 square feet with a 10' ceiling and an uninsulated slab. At the time of this billing period, it has slightly sub-standard attic insulation (due to settling). It is built with the Building Technique #2 – double wall construction. All of the above bills are available upon request.

- The reason that I have separated out the Gas from the other charges is – if you are going to use propane for your fuel, then you won't have these 'other' charges – you will pay whatever your tank rental is, unless you own your own tank. And with these numbers, a 100 lb. tank is all that you would require (i.e. NO tank rental charge).
- Other Charges = 1) Basic Charge, 2) Storage & Transport, 3) Delivery, 4) Carbon Tax, 5) Clean Energy Levy, 6) GST
- * As of this bill, my new home furnace was brought online with the gas company, producing a split bill with the SHOP. The house fees are not included with the figures on this page.
- ** "Households that used Natural Gas consumed, on average, 92 GJ of this fuel." (2011)
