

Now, when your player is set to work with your display and audio system, you have to point it to your media source. You can use mouse and keyboard, remote control or Kore App.

Attn: If you purchased server and players from Perfect Home Theater, this setting is done during setup and you don't have to do anything, just close this instruction and enjoy your system.

If you purchased player(s) from us separately, you have to point it to your media source.

(">" = "go to")

To point your player to your server: Go to Videos > Files

Enter.

Right click on Videos. If you use remote, press DVD button. If you use Kore press symbol on remote screen.

Videos - Files		13:3
Demo Videos		
Movies

Add videos		
	Enter a name for this media source.	
	Movies	
	OK Cancel	
	(6) Items - Page (1/1)	

Attention: If you have more movie sources, you have to add them here so click on Add and repeat above process. When you added all movie sources, click OK on the bottom. You will get new screen:

	Set content		
in diverte recordaine	Set content	X	
is directory contains		Movies	
noose information provider		The Movie Database	
ettings			
Conter	it scanning options		
ovies are in separate folders that	match the movie title	۹	
an recursively		9	
elected folder contains a single vio	leo		в
ок	Cancel		
h S C C	hoose information provider Settings Conter lovies are in separate folders that r can recursively elected folder contains a single vid OK	hoose information provider Settings Content scanning options Iovies are in separate folders that match the movie title can recursively elected folder contains a single video OK Cancel	hoose information provider The Movie Database Settings Content scanning options Iovies are in separate folders that match the movie title can recursively elected folder contains a single video OK Cancel

In "This directory contains" choose Movies.

Information provider: "The movie database". There is also option "Local information only", but I recommend for most people "The movie database".

Now you can do the same for Pictures and Music and then your player will be pointed to all folders on your server.

Best Regards Zygmunt Wojewoda (Zigmunt Voyevoda)
