4 REASONS TO MODERNIZE YOUR IT INFRASTRUCTURE

intel | Hewlett Packard Enterprise

1. DECREASE COSTS

69% LESS REVENUE LOSS

from unplanned downtime reported by organizations that modernize

Why Modernize?

- Re-platform apps for faster time to market and increased speed of service
- Lower maintenance costs by upgrading legacy systems
- Reduce business impact from unplanned downtime
- Improve IT staff efficiencies

2. IMPROVE DATA SECURITY AND COMPLIANCE

63% OF ORGANIZATIONS

are deploying advanced technologies without the right data security in place

Why Modernize?

- Deploy the latest hardware-based security full data encryption
- Get better network security from the edge to the cloud to the data center
- Meet compliance needs and regulations
- Reduce risk with faster data recovery and smaller data backup windows

3. GET AN EASIER PATH TO HYBRID CLOUD

55% LOWER COSTS

with hyperconverged infrastructure (HCI) compared to the public cloud

Why Modernize?

- Support mission-critical applications with highly-scalable performance
- Improve infrastructure efficiency, reduce data center footprint
- Centralize management and orchestration with familiar virtualization tools
- Speed deployment of IT services and gain agility without giving up control

4. SUPPORT EXPANDING WORKLOADS

64% IMPROVEMENT IN

the ability to develop new apps reported by companies that modernize

Why Modernize?

- Speed time-to-insight from data with advanced analytics and AI technologies
- Deliver apps and releases faster
- Boost performance for demanding workloads
- Deliver self-service capabilities and developer-friendly tools

Contact us today so we can discuss next steps in upgrading and optimizing your Data Center with HPE ProLiant™ Gen10 Servers powered by Intel® Xeon® Scalable processors.
