

# CPL Theory Short Courses

Effective: 1 July 2021

## Overview

Moorabbin Flying Services is pleased to offer short courses for all CASA Commercial Pilot Licence aeronautical knowledge subjects. These short courses are delivered under CASR Part 141 over six full days and include a practice examination with a Knowledge Deficiency Report at the conclusion of each subject. There is homework and it is expected that participants will self-study outside of class to be fully prepared to sit the CASA PEXO examination for each subject at the end of each short course. CASA exams to be scheduled by participants in their own time.

Delivery is conducted in person at the MFS Theory & Simulation Centre located at 55 Grange Road, Cheltenham, adjacent to the Moorabbin DFO on Tuesdays and Thursdays from 8:00 AM to 4:00 PM. Materials provided include workbooks, worksheets, and practice exams. Textbooks for the courses may be purchased through MFS or from the pilot shop of your choice. While used textbooks are acceptable, only the most current editions will fulfill MFS and CASA requirements.
