

ESI dPhone4™ Business Phone

Bring some color to your digital communications

The ESI dPhone4 Business Phone

Add some color to your digital world with the all-new ESI dPhone4. This first-of-its-kind digital business phone sports a 4-inch color display and can be deployed on both ESI Communications Servers™ and IP Server 900™ solutions.

Why Choose an ESI dPhone4?

The ESI dPhone4 - the *only* digital business phone on the market with a color display - is ideal for most active phone users. The 4-inch color display provides clear status indication for up to thirty-six (36) desi-less programmable feature keys to allow users to see the information they need quickly and helping them achieve maximum productivity. A full duplex speakerphone facilitates crisp and clear hands-free communication by preventing voice dropouts between parties. Users who need assistance in programming the phone also benefit from the HELP key that guides them through set-up, allowing them to spend less time programming and more time focusing on business.

ESI dPhone4 highlights:

- 4-inch **COLOR** display
- Thirty-six (36) desi-less programmable keys
 - can expand to 156 with ESI Expansion Consoles
- ESI-exclusive Visual Voice Mail
- Electronic Hook Switch
- ESI HELP key
- Full duplex, hands-free Speakerphone
- Compatible with ESI IP Server 900™ & ESI Communications Servers™
