CORPORATE PROFILE

The StanMach Group has been in business for over 6 decades and has been strongly associated with the Graphic Arts industry in India, since inception.

Over the years, we have diversified into the Packaging, Food Processing and Confectionery / Chocolate industries. We offer a gamut of solutions catering to the needs of customers from the above verticals.

Today, we exclusively represent some of the leading manufacturers' of machinery, equipment and consumables for the above mentioned industries from across the globe. Our clients range from leading Convertors, Commercial Printers, Publishers & Newspapers to Confectionery, Chocolate and Snack Food manufacturers'.

The group employs people with a wide variety of skill sets including engineers, technicians and business majors. With a pan India presence, we have a strong distribution, retail and marketing base; managed by a team of dedicated professionals.

To supplement the above businesses we have in place dedicated infrastructure and support facilities over the years, honed with valuable insights from our clients, business partners and team members.

Please feel free to get in touch with us for further information.

A: TWO HAND DISINFECTION MACHINE - WALL MOUNTING OR STAND ALONE

We have developed the disinfectant type HI320-HD which ensures that every customer/employee or visitor automatically disinfects his hands and thus protects himself and his fellow human beings before contact occurs.

Whether at the reception desk of a bank, insurance company, hospital, community centre, restaurants, bakeries or butcher's shops etc., with this station it can be ensured that the hands are perfectly disinfected before entry and thus the hygienic conditions are considerably improved.

Especially in grocery stores where fruit and vegetable products are openly available and can be touched in an uncontrolled manner, this station can significantly improve the hygienic conditions and protect people efficiently.

HYGIENE SOLUTIONS

B: TWO HAND DISINFECTION AUTOMATIC WITH ACCESS CONTROL

With this station, access is only granted once the hands have been safely disinfected. The turnstile is automatically released after hand disinfection. If the hands are not disinfected, the turnstile is not released, and access remains denied.

C: ACCESS CONTROL WITH PERSON MONITORING & COUNTING

For industrial customers we also offer individual disinfection solutions and controls with customized logistics solutions. Turnstile with access control with controller and display and counting device whereby the number of visitors and hands disinfection is monitored and controlled and thus a constant hygiene control is guaranteed.

HYGIENE SOLUTIONS

TWO-HAND DISINFECTOR

This professional hand disinfection device made of high-quality stainless steel (1.4031) was developed especially for the strict requirements of the food industry. By means of modern sensors, this hand disinfection device ensures outside-proof disinfection of both hands. Via a potential-free contact, the hand disinfectant can be easily connected to a door opener, a traffic light system or a turnstile on site.

PROPERTIES OF THE TWO-HAND DISINFECTION DEVICE

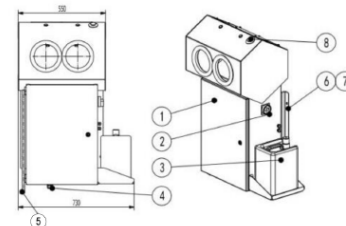

- Made of high-quality stainless steel (1.4031)
- Sensor-controlled triggering of hand disinfection
- Especially developed for the food industry
- Residual waste container included
- Extremely robust and durable in daily use
- With integrated canister holder up to max. 5 litres
- Available as floor-standing or wall-mounted unit
- Disinfection of the hands with two nozzles
- 220/230V power supply cable

TECHNICAL DATA

Construction: stainless steel material 1.4301
Dimensions: 550 x 406 x 1074 mm
(length x width x height)
Starter: Sensor
Power supply: 230 V/N/PE, 50/60 Hz;
220 V/N, 50/60 Hz; 110 V/N, 50/60 Hz

1. disinfection of hands
2. main switch
3. canister holder
4. power connection
5. drain connection
6. wall mounting unit
7. plinth mounting
8. emergency stop

TWO-HAND DISINFECTOR WITH ENTRANCE CONTROL

Access to the hygienic area is reliably protected by the entrance control with hand disinfection. The entrance control unit ensures compliance with the strictest hygiene regulations by ensuring that all employees can only enter sensitive production areas with perfectly disinfected hands. The entrance control with hand disinfection convinces through the use of high-quality materials and excellent workmanship.

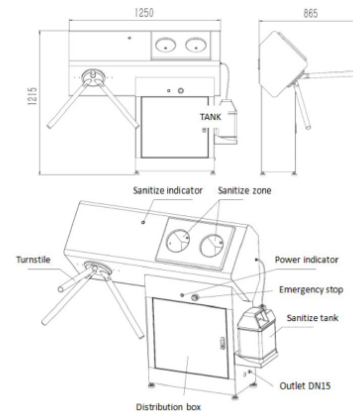

PROPERTIES OF THE TWO-HAND DISINFECTION DEVICE

- Made of high-quality stainless steel (1.4031)
- Outside-proof two-hand disinfection
- (sensor-controlled)
- Sensor-controlled triggering of hand disinfection
- Especially developed for the food industry
- Container for receiving disinfectant residues
- Residual waste container included
- Extremely robust and durable in daily use
- With integrated canister holder
- Available as floor standing unit
- Disinfection of the hands with two nozzles

TECHNICAL DATA

Construction: stainless steel material 1.4301
Dimensions: 1250 x 865 x 1215 mm
(length x width x height)
Starter: Sensor
Power connection: 230 V/N/PE, 50/60 Hz;
220 V/N, 50/60 Hz; 110 V/N, 50/60 Hz

HYGIENE SOLUTIONS

PERSONAL ENTRY COUNT

The people counter is a mobile counting system for measuring and directing the flow of people in buildings. The visual cues in the slim column construction make it easy to control the flow of people. The integrated sensor function detects the entry and exit of individual persons. A Siemens Touch Panel signals and advises people of the maximum number of people.

PROPERTIES OF THE CENSUS OF ADMISSIONS

- High quality control system from Siemens
- Simple operation and adjustment of the number of persons
- Indication via LED colour change green and red
- with acoustic alarm
- Simple plug-and-play solution and quick installation
- Optical counting by IR sensors
- Digital display by Siemens touch panel
- Amount of persons adjustable via touch panel

TECHNICAL DATA

Construction: Sturdy steel construction
painted RAL
Dimensions: 50 x 30 x 1250 mm
(length x width x height)
Starter: Sensor
Power connection: 230 V/N/PE, 50/60 Hz
220 V/N, 50/60 Hz
110 V/N, 50/60 Hz

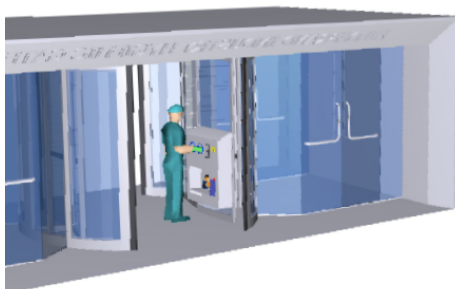

SINGLE SOLUTION PURE PEOPLE COUNTING

SINGLE SOLUTION TWO-HAND DISINFECTION OR TWO-HAND DISINFECTION WITH ENTRANCE CONTROL

Hygienegate as wall-mounted or on a base for perfect disinfection of the hands: viruses and bacteria are reliably killed by the hands before entering the building. This reduces the carry-over of germs on shelves and contact points in particularly frequently used passageways. This solution is also available as two-hand disinfection with personal access control.

The disinfection of the hands is contactless, hygienic and perfectly dosed.

DOUBLE SOLUTION WITH PERSON COUNTING TWO-HAND DISINFECTION OR TWO-HAND DISINFECTION WITH ENTRANCE CONTROL

In smaller premises with limited space, it is particularly urgent to avoid crowds of people and to protect the people at entrance controls. A combined solution from HILDEBRAND Industry AG with an entrance people counter and two-hand disinfection device replaces the person needed for entrance control and thus reliably protects them from the high risk of contamination with viruses and bacteria. This solution is also available as two-hand disinfection with personal access control. Via a potential-free contact, the turnstile is released after the permitted number of persons has been released and hands have been properly disinfected.

Whether restaurant, shop, business premises, this solution minimizes the risk of infection by viruses or bacteria of your employees and provides a worry-free working environment.
