

FOCA Elert ~ March 2022

Member Associations in action:

Lead Fishing Tackle Buy Back

Here is a great member initiative worth talking about: the **Wolfe Lake Association (Westport)** is launching a 1-year voluntary program starting on **March 31, 2022** to incentivize local anglers to exchange their existing toxic lead fishing tackle for a \$10 voucher to purchase non-lead alternatives at participating retail locations. This has been sponsored by a grant from **South Frontenac Township**, together with program partners and sponsors. Read more about lead toxicity, and the program, here: <https://wolfelake.org/fish-lead-free>, or reach out to Margie Manthey, Fishing Director at WLA(W) to learn more about how your lake association could get involved.
