

# **PROTECT YOUR WATER WELL FROM FREEZING TEMPERATURES**

- **If you have a well house, install a heat lamp or incandescent bulb, use caution to keep away from flammables or combustibles.**
- **If no well house, protect your tank and pipes by wrapping with blankets and other insulated materials**
- **Wrap/Insulate exposed pipes**
- **Run water continuously during freezing temperature periods**
- **Jet pumps should be protected from cold by heating or insulating**
- **Submersible pumps are deep enough they're self-protected.**
- **If uncertain, contact your trusted Home Inspector or Water Well Company.**
