

M203 EXPIC STAND ALONE

DAYCRAFT
SYSTEMS 

This system allows for the Daycraft M203 EXPIC 40mm grenade launcher to become an independent system. This launcher is compatible with all standard 40x46mm low velocity ammunition, and mounts to a picatinny rail.

The Stand-Alone grenade launcher system works by using the Picatinny mounts of the gun to attach to a modified rail which mates with a buttstock adaptor. Since not all rifles are equipped with Picatinny rails. The system allows the capability to have access to a grenade launcher without having to complete any large modifications to any non-picatinny rifle. The Stand Alone also allows the rifle to become less encumbered. At any time, the M203 EXPIC can be attached to a 1913 Picatinny railed rifle with a few tools.

The M203 System includes a Leaf sight.

M203 EXPIC STAND ALONE
