

KILDENS

COMPRESSIBLE SCOTCH BLOCKS

DO YOU WANT TO REDUCE DERAILMENTS ?

As the inventor of the industry leading Compressible Scotch Block, Kildens had with one thing in mind, to reduce the risk of derailments in the rail industry

Extensive research and design in partnership with leading rail operators has developed a high quality Compressible Scotch Block that is fast becoming the industry standard

The two piece design foam & wood ensures constant adhesion with block and wheelset. This limits wheelset height travel and reduces chances of derailment

- ⚙️ Reduce risk of derailments
- ⚙️ Reduce incident investigation costs
- ⚙️ Fast becoming industry standard
- ⚙️ High visibility
- ⚙️ Quality components
- ⚙️ Used by leading names in rail industry

OUR MISSION

At Kildens, our mission is to provide our clients with the highest quality rail safety equipment and supplies while maintaining a commitment to excellent customer service. We work tirelessly to ensure that our clients receive reliable and cost-effective solutions that meet their specific needs

OUR EXPERTISE

With over 50 years of experience in the rail industry, Kildens was formed with one thing in mind, to reduce the risk of derailments in the rail industry. Using extensive industry knowledge and expertise to provide our clients with the best possible solutions. Our team of experts is always up-to-date with the latest industry trends and technologies.

OUR PARTNERSHIPS

At Kildens, we value our partnerships with leading manufacturers and suppliers in the industry. We work closely with our partners to ensure that our clients have access to the latest and most advanced products and technologies.

COMPRESSIBLE

SCOTCH BLOCK

TYPE 1

Suitable for use on 720-840mm rolling stock wheelsets however can be re profiled for other sizes

Featuring a unique 2 part foam and wood design. As with all our Scotch Blocks, the Compressible Standard Scotch is made from steamed beech

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

COMPRESSIBLE

SCOTCH BLOCK

TYPE 2 LOOPED

A single handle roped version suitable for use on 720-840mm rolling stock wheelsets however can be re profiled for other sizes

Featuring a unique 2 part foam and wood design. As with all our Scotch Blocks, the Compressible Standard Scotch is made from steamed beech

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

COMPRESSIBLE

SCOTCH BLOCK

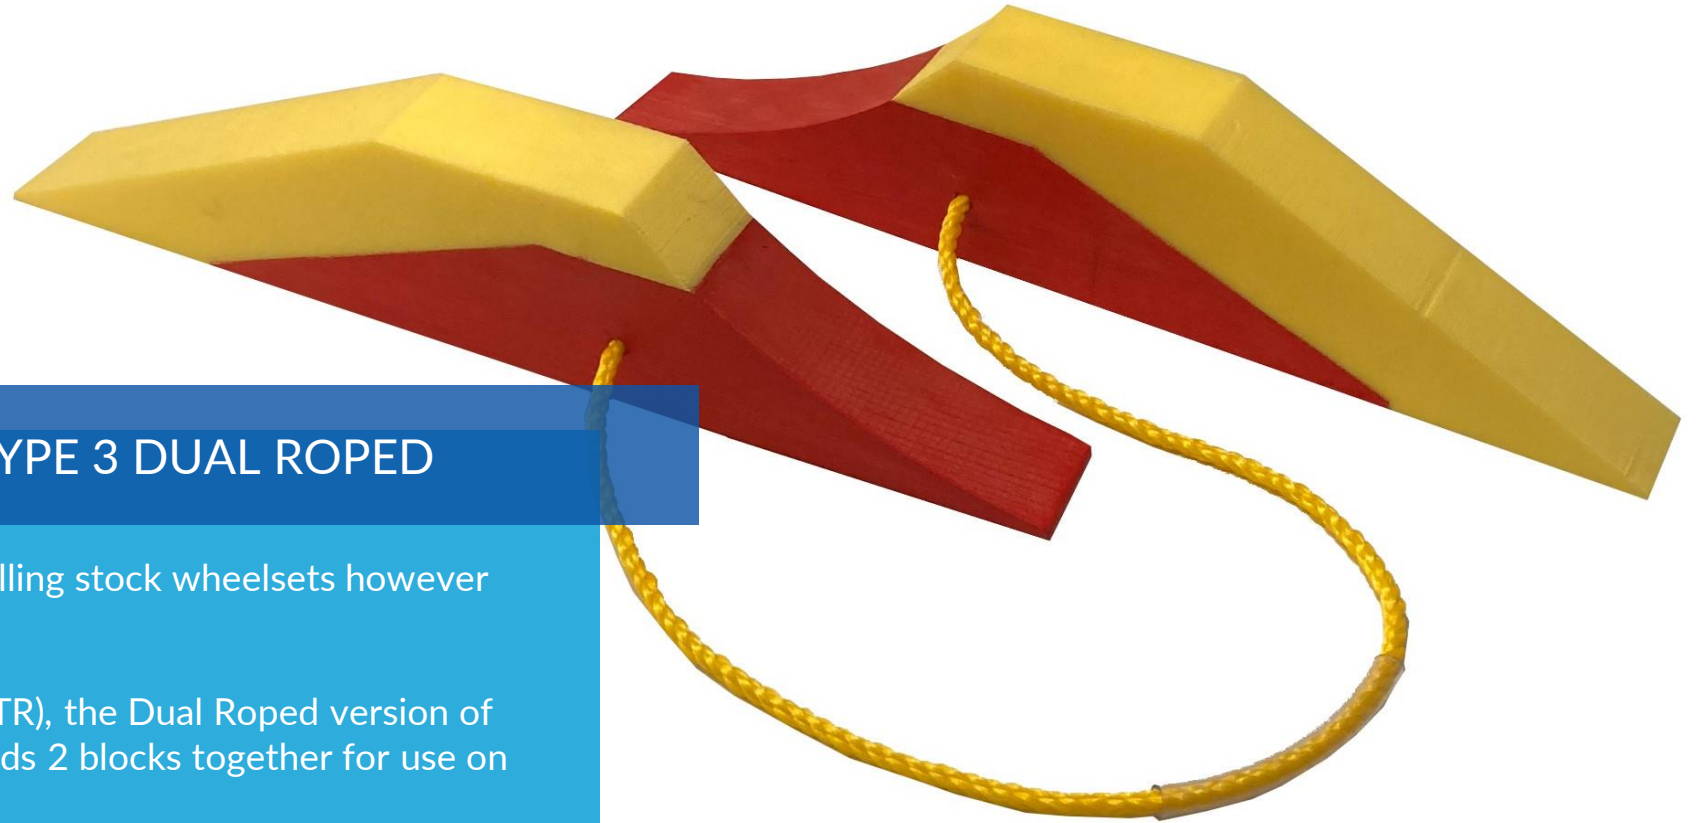

TYPE 3 DUAL ROPED

Suitable for use on 720-840mm rolling stock wheelsets however can be re profiled for other sizes

Designed for Govia Thameslink (GTR), the Dual Roped version of our Compressible Scotch Block binds 2 blocks together for use on a single wheelset

Featuring a unique 2 part foam and wood design. As with all our Scotch Blocks, the Compressible Standard Scotch is made from steamed beech

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

COMPRESSIBLE

SCOTCH BLOCK

TYPE 4 BULL NOSE FREIGHT

Suitable for use on 720-840mm freight wheelsets

The reduced length bull nose ensures the block meets the heavy duty requirements of the freight industry

Featuring a unique 2 part foam and wood design. As with all our Scotch Blocks, the Compressible Standard Scotch is made from steamed beech

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

COMPRESSIBLE

SCOTCH BLOCK

TYPE 5 Reduced Profile

Our Reduced Profile version suits rolling stocks with smaller wheelsets including trams and tube/metro stocks

Featuring a unique 2 part foam and wood design. As with all our Scotch Blocks, the Compressible Standard Scotch is made from steamed beech

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

STANDARD WOODEN

SCOTCH BLOCK

STANDARD WOODEN

Available in in FULL, HALF and HALF CURVED version in colours to suit

Where compressible are not required we provide our Standard Wooden scotches. Made from the same high quality materials

The steam bending properties are exceptionally good, even tolerant of knots and irregular grain. It has medium stiffness, high crushing strength and medium resistance to shock loads

OTHER PRODUCTS

SEE MORE FROM US

SAFETY TARGETS

Our printed Safety Targets are made from highly visible Class 1 fire rated foamex. Light, durable and easy to maintain

Fully customizable in an array of fonts, styles and images to suit your company's needs

Also available with Scotch Block holder

SHUNTERS TARGETS

Our Shunter Targets are available if there is need to warn staff or prohibit train movement.

Often used in defect scenarios

DOOR RUNNER CLEANING TOOLS

Replaceable brush heads aid the clearing of debris from door channels and runners on externally hung rolling stock doors

Also available in flexible rod form to clean deep into channels and runners
