Editorial:

This edition is published lacking the Identities Catalogue and the New Identities pages. This heralds the sad news of the passing of our friend and fellow collector, Basil Tomkins. He will be missed by us all. Appreciations from the President and the Secretary appear in these pages.

We have included extra pages of articles but hope to return to the publishing of the Catalogue and New Identities in future issues.

For the third time in as many years the Society has suffered the sad loss of one of its founder members and officers of long standing. Everyone will receive with great sorrow the news that our Catalogue Editor, Basil Tomkins, died in All Hallows Hospital, Ditchingham, Suffolk, on the 23rd August, 1984, following a short period of ill-health. The condolences of the Society have been conveyed to Basil's sister, who is his closest relative, by our Secretary, Michael Rucklidge.

Basil will be greatly missed. A Society such as ours relies heavily for its very existence on the time and effort which its voluntary officers are prepared to devote to its affairs and in this respect we are greatly in Basil's debt. His involvement with the catalogues began in 1960 when he compiled the first comprehensive simplified listing of perfin dies, enlarging substantially on earlier work.

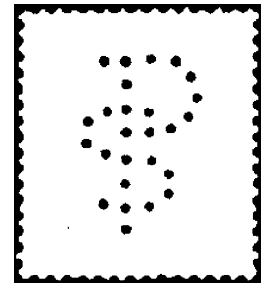

In the summer of 1962 he offered to undertake the future editing of the full Identities Catalogue, an offer which was gratefully accepted, but curiously it was not for another year that his name appeared at the top of the Society's Bulletin. There it remained ever since, the address changing occasionally, but always in his native East Anglia.

Despite the difficult journey, Basil was a regular attendee at our London meetings, from the first ever held in 1961. He was essentially reserved and unpretentious, but possessed a methodical mind and the gift of precise application to detail, qualities so essential to the catalogue work he undertook so conscientiously and well. In recent times his invaluable co-operation with Harvey Tilles in his work in the Illustrated Catalogue and Album of GB Perfins will be acknowledged by collectors of British perfins throughout the world.

As a collector of perfins, Basil's knowledge was extensive, his enthusiasm boundless. His comprehensive collection clearly reflected the considerable pleasure which this interest gave him, particularly following his retirement several years ago.

Basil leaves his own lasting memorial - a painstakingly compiled and reliable Identities Catalogue providing a sound foundation on which all can share in building for many years to come.

In recent weeks there has been an increased demand from members to have their postage stamps perfinned with the Society die. This machine is currently held by the writer, who will be pleased to oblige any request as long as the stamps are current valid mint ones of a country who has authorised the usage of our die.

Because there has been some additions to the list it may be as well to outline which postal authorities do allow it (* denotes a recent addition to list) :-

GREAT BRITAIN

AUSTRALIA

EIRE

NEW ZEALAND

SWEDEN

U.S.A.

Local Posts of :-

*ILES CHAUSEY - Channel Islands

*ISLE OF CANNA

*LES ECREHOU

*LES MINQUIERS - Channel Islands

*LUNDY ISLAND

*STEEPHOLM - Bristol Channel

The Local Post stamps are of course carriage labels and still have to bear postage stamps in addition, either of Gt. Britain, Channel Islands or France, depending upon where they are situated. Nevertheless the writer, being a stickler for correctness, refused to perfin any of them until confirmation that the issuing authority in each case had authorised the use of a perfin upon the 'stamps'. In most cases also I have now seen commercially used examples through the post, but all have so far been perfinned in very small quantities.

One Society member has applied to the Spanish Postal Authorities for permission to perfin, but to date no reply has been received. The recent addition of New Zealand to the list is thanks to Barry Pawson who received a letter from the Director of Postal Services dated 6th August 1984, part of which reads -

"In general terms, the Post Office sells stamps in payment for postal services. Once the stamps are sold, the

department is not concerned with what the customer does with them. Accordingly, your Society may perform stamps providing the perforin design does not obscure the design of the stamp or the denomination.

In passing, I should mention that the Post Office does not 'repurchase' perforinated stamps."

The only Postal Authority known to have refused permission is CANADA, but there must be others willing to allow it who have not yet been approached - say FRANCE or HOLLAND for example. Perhaps members residing there may like to try? If successful, just send a photocopy of the letter of consent to the writer and he will be pleased to extend the list of users and give future generations of perforin collectors something to look out for.

GRAPHITE LINES ISSUE PERFINNS - ERRATA

A list of perforins noted in the Graphite Lines issues appeared on page 4 of issue No. 211 (June, 1984) and, unfortunately, it contained a number of significant errors. (The Editor takes full responsibility - humble pie is the order of the day!)

The corrections are as follows :-

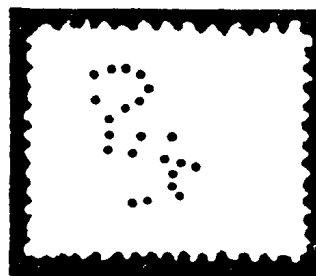

T & S	on	SG 566	(not 556)
J/LD	on	SG 562	(not 588)
CK	on	SG 593	(not 589)
FRY	on	SG 563 and SG 594	(not 589)
L/&CO/Ld	on	SG 563	(not 589)
C/W/S	on	SG 593 and SG 594	(not just 594)

Other items reported in issue 211 and 212 are correctly identified.

FIND THE MISSING HOLES !

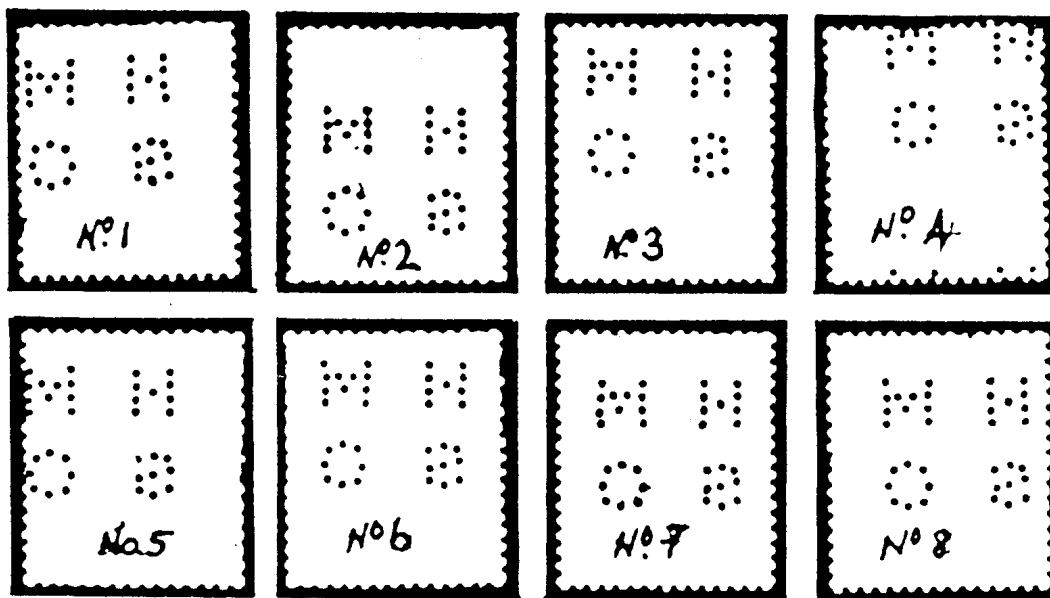

by Keith Lloyd

Can anyone identify or explain this rather odd perforin? I have this example on a USA 5c blue Monroe definitive (SG1036). There is no sign of any blunt pin marks which could make the pattern into a recognisable set of letters.

HM STATIONERY OFFICE (Hurlin Die)

It has been pointed out to us that the standard of workmanship shown in the construction of this die is poor. This leads to significant differences between individual perfins in the comb and subsequently up to twelve variations could be identified. The comb could, theoretically, be reconstructed but as this die is very rare and we know of no multiple examples, this may be impossible. Nevertheless, it would be interesting to record all twelve variations, so we call on members who hold this perfin (not to be confused with the more common Sloper Die) to let the editor have photocopies of the backs of your examples (or send them for photocopying). Eight variations of this die have already been identified from the collections of the editor and of Reg Powell as follows. (The numbering is arbitrary).

- Type 1 : H has eccentric dot and left leg curved
- Type 2 : H has short left leg which is not straight
- Type 3 : M has right leg curving out at bottom
- Type 4 : O badly deformed
- Type 5 : M has right leg curving in at bottom
- Type 6 : H has vertical strokes out of alignment
- Type 7 : M has both legs curved
- Type 8 : M has top hole of right leg high

Member would like to contact anyone with an interest in or knowledge of Spanish perfins: Mr. M. Gibson

I had my first stamp album more than eighty years ago and for years I collected stamps in schoolboy fashion. Forty years ago I joined a Club and then started to specialise.

A few years ago I started to put aside all the Perfins I collected from lots of Kiloware. Last year I saw John Coles' advertisement of his Perfin Auction. I did not understand what the numbers after the Perfin letters meant so I wrote to John Coles who explained it to me. He also told me about the S.E.P.S. and gave me Mr. Rucklidge's address. I joined the Society and got various pamphlets and their list of Identified Perfins. I bought various lots at auction and realised that I must specialise.

I decided to collect anything to do with the Counties of Essex, Hampshire and the London Boroughs.

Recently a friend of mine told me his brother had a lot of QV 1d Reds for sale and wanted £10 for them. When I saw them I realised he had undervalued them, so insisted that he took £60. Even then I think I had the best of the bargain.

I then decided to add GB from QV to EVII to my collection.

I now have 50 1d Reds with recorded Identities and many more unrecorded with Plate Nos. 107 upwards.

Although I had only been collecting for a few months I entered one of the Club Competitions in which I had to show 15 sheets and talk about them for five minutes. I was very pleased to come second.

The Philtex organisers wanted these to put in their yearly show last month, so I managed to make it up to 21 sheets.

As a means of research, I am trying to allocate perfins BC, CCC and LC to all the Companies and Corporations which use these letters. The letters often vary in shape and the holes vary in size from 0.55 to 0.84 mm. Very few have legible postmarks.

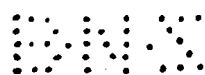

I measure the holes with a graduated set of sewing needles sizes 9 (0.5mm) to 5 (0.84 mm). I cannot get enough Perfins with these letters so if any members have any to spare, I should be pleased to have them.

Most perfin patterns are relatively simple so that makers mistakes no doubt stand out and are corrected before the die is sold to the user.

There must be very few dies in our Perfin collections which were passed by their makers as satisfactory, were accepted by the user yet display an obvious error. I have noticed just the one in my collection and the article by Barry Pawson in the June, 1984 Bulletin gives me the opportunity to bring this as a third Type of the Bank of New Zealand perfin, to your attention.

Type III has the stops raised two hole levels to a central position, the letters 'B' and 'N' match those of Type I, but a new 'Z' was needed, and the workman got two of its nine pins in wrong positions, giving a reversed letter.

What a lovely exhibition item has come from the Bank of New Zealand! I wonder how long the error was in use before being noticed and withdrawn? So the hunt is on, and please report your findings. My copy is the 10 shilling, SG 183, postmarked LONDON/B (?)/ AP 25 / 95 (or possibly 90 or 96) / X, in 28 mm circle.

Type III

In addition to the stamps mention in the above article, I can add for Type I the 2/6, SG 179. It has an unclear year, but that of my 10d is '92. For the Type II my 10d, dated FE 14 96 is of the bright scarlet shade, SG 210a, and I can add the 1d lilac of 14 NO 95, 2/6 and 5/-, SG 179 and 181, KE VII 2½d, SG 231, KG V ½d SG 351, and 2/6, SG 415a and the KG VI 2d, SG 465.

PERFINS ON CHANNEL ISLAND STAMPS

We have received a request from the "Channel Islands Specialists' Society" for information regarding perfins on stamps used in the islands. These appear to be quite rare, but the editor would be pleased to hear of any perfins on stamps with identifiable Channel Island postmarks (or otherwise identified with the Islands). We will collate any information received and report it to the Specialist Society.

A NEW ZEALAND IDENTITY

by Jack Brandt

New Zealand perfins have had at least three different catalogues, so one should be pleased when one finds a perfin unrecorded in any of them. My new type is J/NATHAN/& Co of Gibbons 187. Has anyone else a copy of this type, or does anyone know anything about the user?

For members interest the three catalogues are :-

1. Perfins of New Zealand - R.M. Startup, undated, published by The Perfin Club.
2. New Zealand Stamps with Perforated Initials - R.D. Samuel, 1968, published by The Postal History Society of New Zealand Inc.
3. The Tasman Catalogue of New Zealand "Perfins" 1970, published by Laurie Franks Ltd.

HELP !

Non-Member would like to contact anyone with information on the reason for "cancelling" of high value (1 shilling and above) stamps of GOLD COAST 1904 to 1909. Cancelling is by perfin "CANCELLED" 9 mm high extending over more than one stamp. If you are able to help please write to:

Mr. M. de N. Ensor

HIGH VALUE PERFIN

We noted a "GWR" perfin on sale in a London Dealers recently priced at £65. It was, to be fair, on SG 45 plate 225, but it is still a high value for a perfin.

Basil Tomkins

It is with the deepest regret that we announce the death of our Catalogue Editor, Basil Tomkins. We shall all miss him because of the immense labours he put into the production of catalogues. Those of us who knew him personally have lost a good friend. An appreciation by our President appears on Page 2 of this Bulletin.

BURY ST. EDMONDS PERFIN

Member, Reg Powell, has provided us with more information regarding this item (see page 11 of issue 212). He has a Die I on KG VI 1d pale red, 2½d pale blue and ½d pale orange also on QE II Wilding 2d, 2½d, 3d and 4d, thus extending the range of use. The 4d is multiple crowns watermark, has larger holes and is postmarked Bury St. Edmonds.

Reg also reports two more dies on the 2½d pale blue with matching BS but differing positions for the E. These are presumably provisionals.

The loss of Basil Tomkins, compiler of this catalogue, is reported elsewhere in this issue. His absence will be noticed in many ways, but the most obvious at this time is the fact that there are no "New Identities" and no further catalogue pages in this issue. The catalogue will not be allowed to die with Basil, however, as I will be taking over as compiler and would wish that the catalogue be officially renamed "The Tomkins Catalogue of Identified Perfins" in recognition of the work Basil has put into it over many years. It is usually referred to as the "Tomkins Catalogue" unofficially anyway and an official change will make it a fine living memorial which will surely be a fitting way to remember our late friend and co-collector.

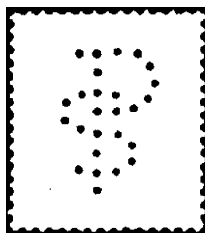

In view of this change, all new identities and corrections to the catalogue should be forwarded to me at the editorial address and should be accompanied by details of the evidence. No other changes are envisaged and I hope to publish both "New Identities" and further catalogue pages as soon as possible, but the collection and sorting of Basil's papers will take some time so please forgive the break - normal service will be resumed as soon as possible.

I have taken over this task as a temporary emergency measure but am willing to continue it indefinitely if no other member wishes to take over. If any member would like to relieve me of the tasks of Catalogue Compiler and/or Bulletin Editor, please contact me at the editorial address

AUCTION NO. 5 (1984)

A veritable cascade of perfins has inundated me since my request for lots in the last Bulletin, but to ensure the continuity of auctions, please do not hesitate to send further items.

The continuing success of the auction is reflected in some very high realisations of late, with mixed lots being in particular demand, as are good covers and Foreign lots. The worst performers are individual high value stamps where the philatelic value seems to outweigh the perfin value. Certainly they form the bulk of unsold lots.

This auction, which is now collated and typed entirely by the auctioneer to relieve the workload on the Bulletin typist, contains some exceptional mixed lots. There is also a wide range of Railway dies plus the usual pot pourri of 'something for everyone'.

The closing date for this auction is NOVEMBER 30th, 1984. Overseas bidders are advised to send their bids by airmail.

Please post all bids, accompanied by a legible name and address, to the auctioneer at the address below. If you require prices realised straight after the auction then enclose a stamped addressed envelope with your bids. The Society Perfin can also be supplied on any postage stamps forwarded at the same time. Good luck with your bids.

Hon. Auctioneer
