

GO ELECTRIC, AT NO COST.

The Building Electrification Program

The Building Electrification program is offered by Southern California Edison (SCE) to help eligible homeowners and renters electrify their homes by replacing natural gas and propane appliances with high-efficiency electric equipment. The result, a healthier, safer, and more comfortable home! And the best part - there is no cost to you as a participating customer for any of the upgrades made through the program.

The Benefits of Going Electric

Going electric can benefit you, your family, your community, and all of us.

- **Save on energy bills:** High-efficiency electric appliances are three to five times more efficient than gas models, meaning they can often lower your overall energy costs.
- **Improve the health and safety of your home:** Removing gas appliances can improve the indoor air quality of your home, making it a healthier place for you and your family.
- **Better for the environment:** Electrification enables your home to use cleaner energy, which can help reduce carbon dioxide emissions and help California meet its clean energy targets.

What's Offered

If you meet eligibility requirements, you may receive these high-efficiency electric upgrades at no cost. The program covers all equipment and installation costs.

- Heat pump heating and AV system
- Heat pump water heater
- Induction cook stove
- ENERGY STAR® certified electric clothes dryer
- Smart thermostat
- And more!

How the Program Works

There are four stages to program participation. MAROMA Energy Services and our network of authorized contractors will manage your home electrification upgrades.

Step 1. Let Us Know You're Interested!

Submit an online interest form at goelectric.maromaesa.com or call 833-367-5497

Step 2. Qualification and Home Assessment

A program representative will review your income eligibility and the program guidelines with you either in person or by telephone. After qualification, we will assess your home to determine what electrification upgrades it may qualify for. We will also conduct a rate analysis and identify potential bill savings.

Step 3. Service Delivery

The MAROMA Energy Services team will schedule work to be done on your home. Installations and services will be done by approved licensed contractors.

Step 4. Inspection

The program will perform a project inspection to ensure you are satisfied and that installed equipment is functioning properly.

How to Qualify

To be eligible for the Building Electrification program, you must meet these qualifications:

- Be an SCE residential electric customer with an active, individually metered account.
- Live in a single-family home or a building with 4 or fewer units (duplexes, triplexes, and fourplexes may qualify if individually metered).
- Home must currently have a gas or propane furnace and water heater that can be replaced by high-efficiency heat pump equipment.
- Meet program income eligibility guidelines, details at goelectric.maromaesa.com.
- Estimated energy bill impacts must either lower or not change current household energy costs.

If you rent your home, we will need the property owner to sign an authorization form before any work begins.

**GET PROFESSIONALLY INSTALLED,
HIGH-EFFICIENCY APPLIANCES
AT NO COST.**

To get started, complete an online interest form at goelectric.maromaesa.com

or call **833-367-5497**

A representative will contact you to schedule a home visit and begin the process.

The Building Electrification Program is funded by California utility ratepayers under the auspices of the California Public Utilities Commission (CPUC) and is implemented by MAROMA Energy Services through a contract with Southern California Edison (SCE). Program funds are available on a first-come, first-served basis until funds are no longer available. This Program may be modified or terminated without prior notice. Eligibility requirements apply.
