2017
PRODUCT CATALOG

Welcome to our family.

At Medela, we believe that breast milk has been perfectly designed. We know it's life-giving and life-changing. Even in the smallest amounts. We know that mom is committed to breast milk feeding – not only for the health benefits but because of the bond it creates with her baby. This journey is unique to every mom and baby, and we are committed to making sure she has the quality products she needs, the resources to support her, and the community she can count on to be successful.

We support moms every step of the way – through their pregnancy, in the hospital and at home so they can give the best to their baby, every day.

Thank you for choosing Medela.

Melissa Gonzales, Managing Director

Destiny Statement

We exist to enhance mother and baby health through the life-giving benefits of human milk.

For Professionals:

For Moms:

Breastfeeding Support Pledge

We pledge our dedication to breastfeeding as the best nutrition for babies and families. We further pledge that our breastfeeding accessory products and literature shall never be used to influence mothers to switch from breastfeeding to infant formula feeding. Nor shall our breastfeeding accessory products and literature be used in any way to promote artificial baby milk.

Olle Larsson, Founder

This digital catalog is designed to enhance the Medela experience, providing a visual guide with links and item numbers to a selection of Medela's human milk portfolio of products.

Technology commitment

2-Phase Expression® Technology

Medela breast pumps have the original 2-Phase Expression technology, which using the one-touch let down button, has been shown to produce more milk in less time.*

Medela is the only company to provide proven, research-based pump technology that mimics a baby's natural nursing pattern. Through research, Medela learned that there are two distinct phases of how babies breastfeed.

Stimulation phase – when babies first go to breast they suck fast and light to start milk flowing.

Expression phase – after milk flow or “let-down” starts, babies breastfeed with a slower, deeper suck, bringing out more milk faster.

**When double pumping compared to single pumping.*

Symphony®

Hospital-grade (multi-user) solutions

Symphony is a research-based breast pump that is often the starting point of the human milk journey in the hospital. Using a hospital-grade (multi-user) breast pump allows the infant to benefit from human milk, when mother or baby are unable to breastfeed. Mothers also have the resources, tools, and support needed to **initiate, build and maintain** their milk supply. With its technical features, accessories and research base, Symphony is an excellent partner for supporting mothers and their individual needs throughout their breast milk feeding journey.

Symphony® Standard

The Symphony Breast Pump features the standard program card: MAINTAIN. This technology can be used by all mothers to build and maintain milk production.

[Item No. 0240108](#)

Symphony PLUS™

The Symphony PLUS program card contains two different programs for the Symphony Breast Pump: INITIATE and MAINTAIN. These research-based programs were developed specifically to support mothers throughout their lactation journey: to initiate, build and maintain adequate milk production.

[Item No. 0240215](#)

Symphony Trolley

Durable trolley stand for transporting the Symphony Breast Pump.

[Item No. 6007092](#)

Symphony Membrane Cap

Converts the Harmony® manual breast pump to single electric pumping with a Symphony Breast Pump.

[Item No. 8100769](#)

Breast Pump Kits

Symphony® Double Pumping Kit

Moms will be ready to double or single pump any time with the Symphony Breast Pump.

[Item No. 67099](#)

Lactina® Double Pumping Kit

Kit includes Lactina piston for the Medela Lactina Breast Pump.

[Item No. 67094](#)

Symphony Harmony® Double Duet

This sterile kit is designed for efficient, simultaneous pumping of both breasts, supporting both single or double pumping.

[Item No. 67115S](#)

Harmony Symphony Duet

Harmony Breast Pump with membranes, tubing, and bottles for double pumping.

[Item No. 67114S](#)

Conversion Kits

Harmony® to Lactina® Conversion Kit

Contains piston, cylinder, tubing, and pump connector.

[Item No. 67022](#)

Harmony to Symphony® Conversion Kit

Contains protective membrane/cap and tubing.

[Item No. 67023](#)

Lactina to Symphony Conversion Kit

Contains membrane caps and membranes.

[Item No. 67091](#)

Symphony Lactina Breast Milk Initiation Kit

The sterile kit for initiating moms contains components for Symphony and Lactina breast pumps. Includes breast shields, colostrum containers, Lactina piston, and tubing.

[Item No. 67340S](#)

Symphony Breast Milk Initiation Kit

This sterile kit for initiation with the Symphony Breast Pump includes breast shields, colostrum containers, and tubing.

[Item No. 67350S](#)

Symphony Harmony Double Duet Breast Milk Initiation Kit

This sterile kit for initiating moms contains a Harmony Breast Pump, breast shields, colostrum containers, and tubing.

[Item No. 67355S](#)

Did you know there are three stages of breast milk production?

Accessories

Everything you need to start pumping right

We know the benefits of breast milk feeding are numerous. Research has shown that breast milk can lower a baby's risk for asthma, ear infections and diabetes and help protect moms against diabetes, heart attacks, and breast cancer.*

Our comprehensive portfolio includes solutions that play an important role in helping mom provide essential nutrients to her baby, and also benefit

the health of mom as well. Medela's Essentials are focused around breast care, breast milk cleaning, storage and feeding, and breast pump spare parts to support moms' needs and enable her to achieve success throughout every stage of her breast milk feeding journey.

Neonatal Solutions

Warming solutions

Breast milk is important for all infants – especially those born premature. Medela's Neonatal Solutions products are infant focused and designed with the littlest of patients in mind.

neonatal
solutions

Guardian Warmer

Waterless Milk Warmer
in action!

Guardian Warmer®

Offers waterless enteral warming to protect and support neonatal nutritional needs. The Guardian warms a feed as it is delivered and requires no milk pre-warming to deliver an enteral feed in the optimal nutrient temperature range.

[Item No. NGW1000](#)

Waterless Milk Warmer™

Safely thaws human milk to refrigerated temperature in less than 30 minutes for storage up to 24 hours.

Consistently warms milk to temperatures consistent with expressed human milk.

[Item No. 87115](#)

Neonatal Solutions

Breast milk is best

Enteral Feeding Pump

The Medela Enteral Feeding Pump is the perfect solution for enteral feeds which require a mechanical syringe pump option. The compact size, minimal weight and enteral orange coloration make it the ideal complement to any NICU enteral feeding system.

[Item No. ABC-Model4100](#)

neonatal
solutions

ENFit® Syringes

The multi-functional syringe design can be used for pump feeds, closed gravity feeding and venting. The ENFit locking connections create a closed, locking system to minimize misconnections and disconnections.

TwistLok® version also available.

[See website for full list of item numbers.](#)

ENFit Feeding Tubes

Medela Enteral Feeding Tubes are available in a wide variety of lengths, French sizes, and materials to meet the needs of your NICU.

Color-coded orange for easy identification and line tracing.

TwistLok version also available.

[See website for full list of item numbers.](#)

ENFit Extension Sets

Part of Medela's complete, end-to-end feeding system. ENFit connectors create a locking system to minimize misconnections.

Orange Coloration: Color-coded orange for easy identification and line tracing.

TwistLok version also available.

[See website for full list of item numbers.](#)

GraviFeed®

Reduce expenses with the GraviFeed gravity feeding syringe. The hydrophobic filter built into the lid allows air to pass through, creating a closed gravity feeding solution which eliminates the need for costly plungers.

Snap-tight lid minimizes exposure to airborne particulates or contamination while preventing the loss of enteral fluid. This closed solution is also ideal for no gauze, mess-free venting in the NICU.
