*Not all makes and models will be available in your region. Scan the QR Code on this page for our most up to date model list.

5 Start Charging

- 1) Uncoil the charging lead, gently remove the socket cap off the Type 2 (Mennekes) plug. Insert plug into charging outlet. Ensure it is securely connected and not loose.
- 2) Gently remove the socket cap off the Type 1 (J1772) plug, connect to your vehicle inlet – during this process push the button on the handle to allow the clip to easily seat into place, release the button. Ensure the plug is securely connected and not loose.

NOTE: Do not force into place, if there are any obstructions take caution and remove them before inserting the plug.

6 Stop Charging

- 1) Push the button on the handle and disconnect the Type 1 plug from the vehicle inlet.
- 2) Close the protective cap of vehicle inlet.
- 3) Place the protective cap onto the Type 1 (J1772) plug.
- 4) Disconnect the Type 2 plug from the charging outlet.
- 5) Place the protective cap onto the Type 2 plug.
- 6) Store your Charging cable.

NOTE: Never use undue force when plugging in or disconnecting from charging inlets or outlets.

CEVB – Storage Bag (Sold Separately)
