Apple Fritter

A well balanced hybrid...

The result of a careful breeding process that combines the genetics of two classic strains, Sour Apple and Animal Cookies, Apple Fritter is a tasty treat that made the High Times' 2016 "World's Strongest Strains" list. Let the consumers know to be prepared for a hard-hitting high while enjoying a flavourful cannabis experience!

Grower's Information...

Apple Fritter is a vigorous, hearty strain with a high tolerance to different environmental conditions and grower's traits. It has a moderately aggressive veg speed and features thick stalks and large leaves. A bit of extra maintenance will reward the attentive grower!

Take a bite out of this tasty treat...

Introducing Apple Fritter, one of the most recent additions from our extensive legacy strain bank and now added to our collection of premium cannabis production strains. This cultivar is a well balanced hybrid that boasts a deliciously sweet and tangy flavour profile reminiscent of freshly baked apple fritters, an attractive bouquet of colours and a thick frosty coating on every nug.

Yield: Moderate-Heavy

Flower Time: 9-10 weeks

Height: Medium-Tall

Veg Speed: Standard/Fast

THC Range: 26-29%

Funkdafied

A balanced hybrid of exotic origins...

A rare collaboration between breeders gave birth to truly exotic masterpiece. Trichome drenched flowers of purple and pink hues, a wild aroma and flavour profile coupled with an unreal frosty finish all come together in this unique creation!

Grower's Information...

Funkdafied is a relatively low maintenance strain that can easily suit most growing styles and with the right level of attention this plant will reward the focused grower well with a high quality, exotic finish.

Baptized in the Funk...

Originally bred by **Solfire Gardens**, Funkdafied boasts flavours reminiscent of it's exotic lineage, **Funky Charms** (Grease Monkey x Rainbow Chip) and **Bahama Mama** (Tropicanna Cookies x Black Banana). You can expect a fruit smoothie fragrance with an unreal frost coating on trichome drenched purple and pink flowers.

Yield: Moderate

Flower Time: 8-8.5 weeks

Height: Med-Tall

Veg Speed: Fast

THC Range: 25%+

Galactic Cake

Elevate your senses...

Seeking a cosmic cannabis experience that will take you to new heights? Look no further! Galactic Cake is a stellar creation that is the result of meticulous legacy breeding techniques and a deep passion for quality. Embrace the extraordinary and prepare to redefine your cannabis journey...

Grower's Information...

Galactic Cake is a relatively low maintenance plant featuring a medium height profile, evenly spaced branching and internodal spacing and a medium size leaf. It is highly responsive to the tedious grower and will show rewarding results without high maintenance requirements!

Join the Cosmic Cannabis Revolution...

Prepare to be enchanted by mesmerizing fragrance, a heavenly oasis of flavours and embark on a mind expanding voyage to the stars!

Celestial aromas, a stellar experience and a galaxy of effects make this exotic hybrid one that will transcend the consumer into a whole new dimension!

Yield: Heavy

Flower Time: 8-9 weeks

Height: Medium

Veg Speed: Moderate

THC Range: 26%+

Gorilla Grape

A Gorilla in the Midst...

Brought in from our extensive seed bank and recently proven through our own exclusive phenotyping process, Gorilla Grape brings top notch qualities in all categories that growers and consumers alike are sure to love.

Grower's Information...

Gorilla Grape is not the tame! It features highly aggressive growth characteristics from veg all the way through to the final stages of flower. Hard work will reward the conscientious grower however, as this plant is a behemoth that will stand out in your grow room and break records for yield!

The King of the Cannabis Jungle!

Massive production, powerful aromas and very respectful THC and terpene levels make this cultivar one to be reckoned with!

Gorilla Grape features an array of beautiful colours and a unique gas/skunky nose with a subtle grape undertone.

Yield: Heavy

Flower Time: 9 weeks

Height: Tall

Veg Speed: Fast

THC Range: 26%+

Jelly Breath

90% Indica hybrid

Bred by an unknown breeder, Jelly Breath brings to light what a combination of OG Kush Breath lineage can do with the right genetic crossing. Record high THC levels and a generous Terpene profile have resulted from this magical combination of its widely known parents.

Grower's Information:

Jelly Breath is a relatively low maintenance strain to grow. Plant structure features evenly spaced branching with multiple golf ball size buds and large main colas at the top. Minimal defoliation required at week 3 and week 6. Flexible with environmental conditions and nutrient levels.

A strain of legendary proportions...

Dense green & purple nugs and thick, frosty, crystal white trichomes are but two of the gorgeous features of this elite strain.

Coupled with enormous potential for production and high THC levels will ensure satisfaction for even the most hard to please growers and consumers alike!

Mandarin Sunrise

A knock-out level Sativa...

This captivating strain combines the invigorating effects of sativa with a delectable burst of citrus and skunky goodness. Bursing with vibrant orange and pink hues and the delightful aroma of freshly squeezed mandarin oranges, this strain truly captivates the senses!

Grower's Information...

It should be noted that Mandarin Sunrise is not for the inexperienced grower, it is a very aggressive strain that requires a moderate amount of maintenance however the attentive cultivator will truly be well rewarded...

Rise and Shine with Mandarin Sunrise...

Embrace the enchanting hues of the morning sky as you savour the irresistible flavours of the in-house phenotype of our exclusive Mandarin Sunrise strain!

Record breaking levels of production, THC, aroma and taste all make this one to be reckoned with!

Yield: Very Heavy

Flower Time: 9.5-10 weeks

Height: Tall

Veg Speed: Fast

THC Range: 27%+

White Runtz

50/50 hybrid

This highly sought after cultivar was phenotyped in house to produce possibly the best version of this cultivar available on the market today. An exotic lineage of the very well known Zkittlez and Gelato strains, White Runtz ticks all the boxes for production, colours, potency and taste.

Grower's Information:

White Runtz is an aggressive and very hearty strain. Most growers recommend pinching at a very early stage in veg and sometimes even a second time if running a full 21 days before transitioning the plant into flower. Plant structure features long arms with a heavy focus on flower size at the end of every branch.

Runtz is the name, beast is the strain...

If what you're looking for is enormous "Wow" potential then this is the one for you! White Runtz has record breaking THC and Terpene potential, a whopper for production capability and beautiful colours, aromas and taste. This is a market favourite that is sure to please even the most hard to please growers and consumers alike!

Pre-Veg program

Pre-Start plants...

Get a head start with one of our Pre-Starts! These plants are brought to the next level as a second stage between clone and full veg. They are ready to transplant into your ideal growing medium and kick to flower in as little as 2-3 days.

Choose your strain, choose your medium, choose your style & let us do the work for you!

Limitless options...

Our pre-start program is catered to your specific needs, pick your options and away we grow!

Specifications:

- 3" square coco block or choose your media
- 10-14" plant height
- 14-18 day veg
- Single or double topped
- Complete IPM program
- Pest & Pathogen free ✓

Efficiency is the name of the game...

At Life Cycle Botanics, we understand the necessity to be as efficient as possible at all times - and how better to increase efficiency than by reducing your vegetative times. Our dedicated Pre-Veg program allows clients to reserve space and let our team take care of the starting work for you! Our Pre-Start plant option is ideal for those seeking maximum efficiency while allowing you to custom veg your plant in its final stages before kicking it into flower. We also offer custom options to suit your particular needs, reducing your veg time and sometimes eliminating it all together depending on your growing setup. Ask one of us for more details and we will customize and all inclusive pricing plan!

Phenotyping services

Phenotyping cannabis: the key to growing high-quality strains

Are you looking to grow cannabis strains that produce consistent, high-quality buds? Phenotyping might be the answer! By observing and analyzing the physical characteristics of cannabis plants, growers can identify and select the plants with the most desirable traits, such as potency, flavor, and aroma. Phenotyping involves closely examining the plant's structure, including its height, branch pattern, leaf shape, and flower size. By selecting and breeding the plants with the most desirable traits, growers can create new strains or stabilize existing ones. So if you're looking to take your cannabis cultivation to the next level, consider phenotyping your plants! Who knows, you might just discover the next big thing in the world of weed!

Life Cycle Botanics is excited to announce that we are now taking reservations for pheno hunting YOUR strains for YOU! Contact us now to discuss starting your next phenotyping project dedicated exclusively to you by emailing info@lifecyclebotanics.com. Space is limited to enquire today!

Vancouver Island
British Columbia

About Us...

At Life Cycle Botanics...

We believe that a strong start is the best method to achieve a successful outcome. Our nursery, based on Vancouver Island, BC, specializes in high quality clone production with a heavy focus on delivering a vigorous product that has a strong root mass and is pest and pathogen free. All our mother plants are routinely tested for HLVd and test results may be supplied on request anytime. With every order we also send along information on our environmental conditions and IPM. We offer ongoing grower support should you have any questions during the vegetative and flowering cycles of any of our cultivars.

In addition to our clones we offer several other services including pre-start plants, phenotyping, exclusive strain housing and a reserve strain bank – ideal if you have a genetic that you want to hold but nowhere to keep it safe – all of which is run through our stringent IPM and testing program for safe keeping, letting you rest assured that your genetics are in good hands.

In addition to our current strains in production and upcoming releases we are always running strains through our research & development program. Whether this be part of our in-house phenotyping process for the latest, greatest genetic or the rebirth of an old-world classic, we continue to try to bring the cleanest, highest quality genetics to our clients to give you the market advantage you need.

At Life Cycle Botanics, we want to see you succeed.
