**Foundation Inspections**

Depending on size of structure, where you are located and the intended use of the building, you may be required to pull a permit for your building & foundation. In this case there are several possible changes to how your post/foundation is constructed:

1. 15" Diameter holes vs 12"
2. Poured concrete vs pole pads
3. Wind cleats nailed to bottom of posts
4. Jobsite downtime due to inspections
5. An additional trip to complete foundation.

Due to these requirements by the Ohio and P.A. Building Codes, any foundation under inspection will be charged the following fee:

**FOUNDATIONS UNDER INSPECTION:**

**ADD \$900**

#1  
Concrete Blocks

#2  
Block / 4x4" Base

#3  
4x4" Post Foundation

#4
