

STRENGTH

- Atlas Lifting & Rigging Premium hoists are designed for pulling, lifting and positioning loads on the toughest job site.
- Engineered for the harshest of environments and delivering exceptional durability to meet your toughest demands.

SAFETY

- Loaded with industry leading safety features to keep you safe on the job site.
- Compact design is light weight and durable for confined spaces and heavy loads.

RELIABILITY

- Built to the highest tolerances and with the best materials so you know it will last.
- We Upgraded everything on our hoists - US-made Extreme Grease, Gears, Bearings, Braking System, Load Carrying Side Plates, Chrome Plated Corrosive Resistant Internal Parts, Welded Pinion Shafts, Handle Grips, Hooks, Safety Latches, Chain.. You name it and we have upgraded it.

OVERLOAD PROTECTION ADDS AN EXTENDED LAYER OF PROTECTION TO THE USER OF THE HOIST AND THE HOIST ITSELF.

It's not uncommon for a worker to rig a load without knowing the exact weight of what they are lifting. Overload protection prevents lifting or pulling damaging loads beyond the rated capacity of the hoist and when triggered, as well as injury to personnel.

OVERLOAD PROTECTION WILL ACTIVATE AT APPROXIMATELY 150% OF RATED LOAD.
