

Supreme

Species:	<i>Sphagnum cristatum</i>
Length:	Premium grade with 80% longer than 175mm
Colour:	Bright natural colour showing white/cream with some green tips
Contamination:	Very minimal to nil foreign material
Features:	Good bulk and thickness which allows excellent water retention giving good aeration and fertiliser holding. Very easy for root wrapping due to longer length with a beautiful aesthetic value. Long lasting in the pot.
Application:	Commercial

Premier+

Species:	<i>Sphagnum cristatum</i>
Length:	High quality grade with 60% longer than 175mm
Colour:	Bright natural colour with some duller colour permitted if it is thick in nature. Still shows white/cream and can have some green tips
Contamination:	Very minimal foreign material
Features:	A reasonably bulky moss however thickness can vary. This still allows excellent water retention giving good aeration and fertiliser holding. Very easy for root wrapping due to longer length with a good aesthetic value. Long lasting in the pot.
Application:	Commercial

Premier

Species:	<i>Sphagnum cristatum</i>
Length:	Good quality grade with 50% longer than 150mm
Colour:	Various golden browns, cream and light greens
Contamination:	Light foreign material
Features:	Good bulk which allows excellent water retention giving good aeration and fertiliser holding. Very easy for root wrapping due to longer length. Long lasting in the pot
Application:	Commercial

Classic

Species:	<i>Sphagnum cristatum</i>
Length:	Average quality grade with 70% longer than 100mm
Colour:	Various golden browns, browns, cream and light greens. May contain stained or dull ends.
Contamination:	Light foreign material
Features:	Thickness can vary throughout product however water retention is good giving good aeration and fertiliser holding. A good average moss
Application:	Standard retail and some hobby. Good for lining baskets
